SIBM Pune Consulting Casebook

Case Study Extract: Problem Statements, Approaches, Frameworks & Final Answers

43 case studies across Profitability, Market Entry, Pricing, Growth, and Miscellaneous frameworks

Profitability Framework Cases

Case 1: Electronics Company

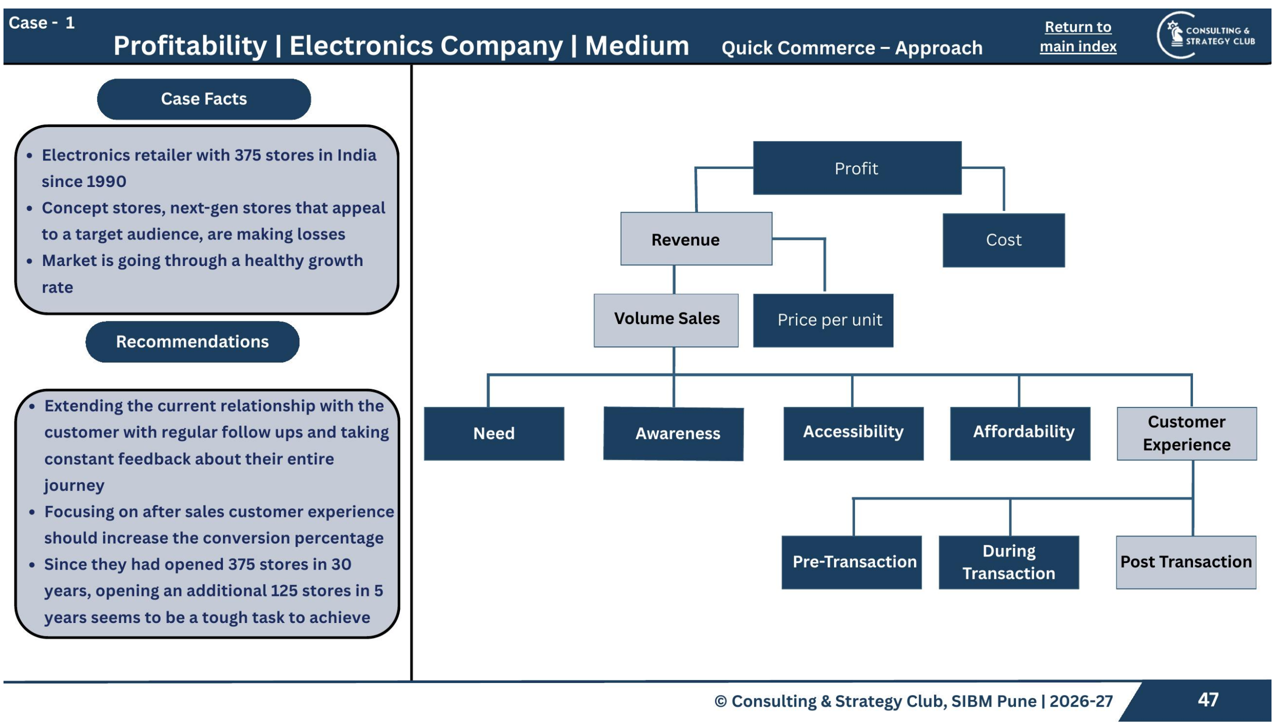
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

An electronics and home appliances retailer in the Indian market since 1990, has 375 stores located across India. They have a healthy profit margin and they are a major player in the market. However their concept stores are making losses. How would you increase the profitability? Also, the client wants to expand their market share from 10% to 20% in the next 5 years. Evaluate how many additional stores would be required and whether they should go ahead with the idea.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

In 5 years, the market size is expected to be \$ 200B and since the client has to double its market share from 10% to 20%, the market share of the client will be 20% of \$ 200B = \$ 40B. The average revenue from each store would also be doubled and it would be \$ 80M. If we now divide our market share by the revenue from each store, we would be getting the total number of stores i.e., \$ 40B/ \$ 80M = 500 Therefore, the client in total would need 500 stores. So, they would need an additional 125 stores Since they had opened 375 stores in 30 years, opening an additional 125 stores in 5 years seems to be a tough task to achieve. Hence, I would go against the idea.

Case 2: PR Company

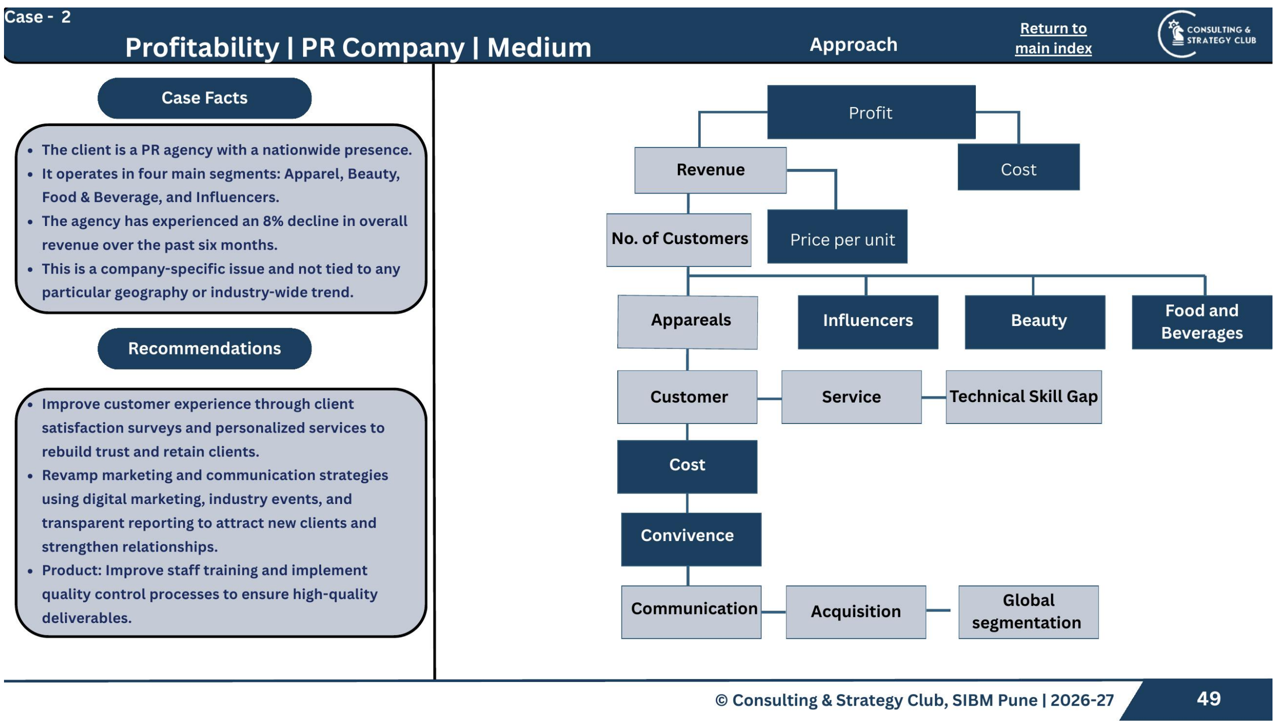
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is a PR agency KYT Informatics Pvt. Ltd. that has experienced a drop in revenue over the last 2 Years. You have been tasked with identifying the reasons for this decline and providing recommendations to address the issue. Please proceed.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

In order to bring in new clients we can work on segmenting our potential clients globally who have currently received investments from venture capitalists. This will ensure that revenue increases and our agency's brand value.

Case 3: Medical Equipment Company

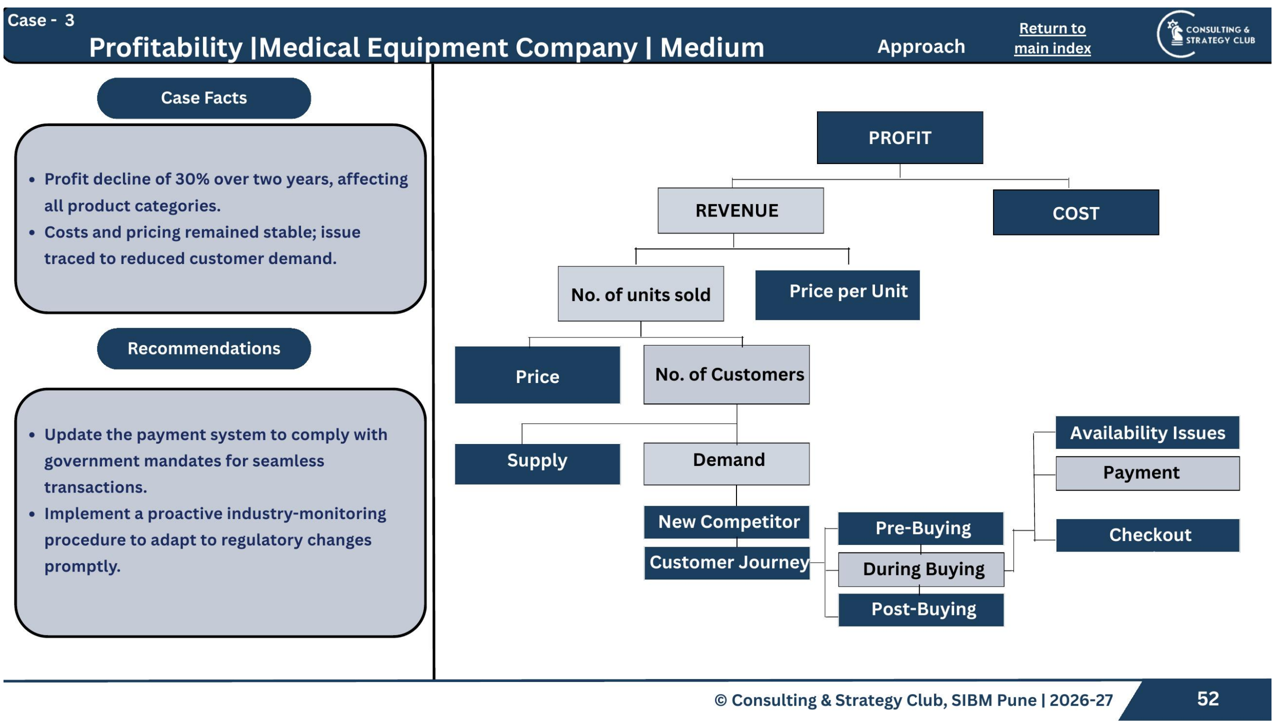
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

MediStar is a medical equipment company that operates in India. It has been in the market for a decade now. However, MediStar has been observing a decline in profits over the past two years. MediStar has reached your consultancy firm to know the reason behind the dip in profits. You have been assigned as the consultant. Please proceed.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

My suggestion would be to establish a procedure within the company to identify new developments within the industry and align the company’s processes to industry benchmarks.

Case 4: Retail Chain Outlets

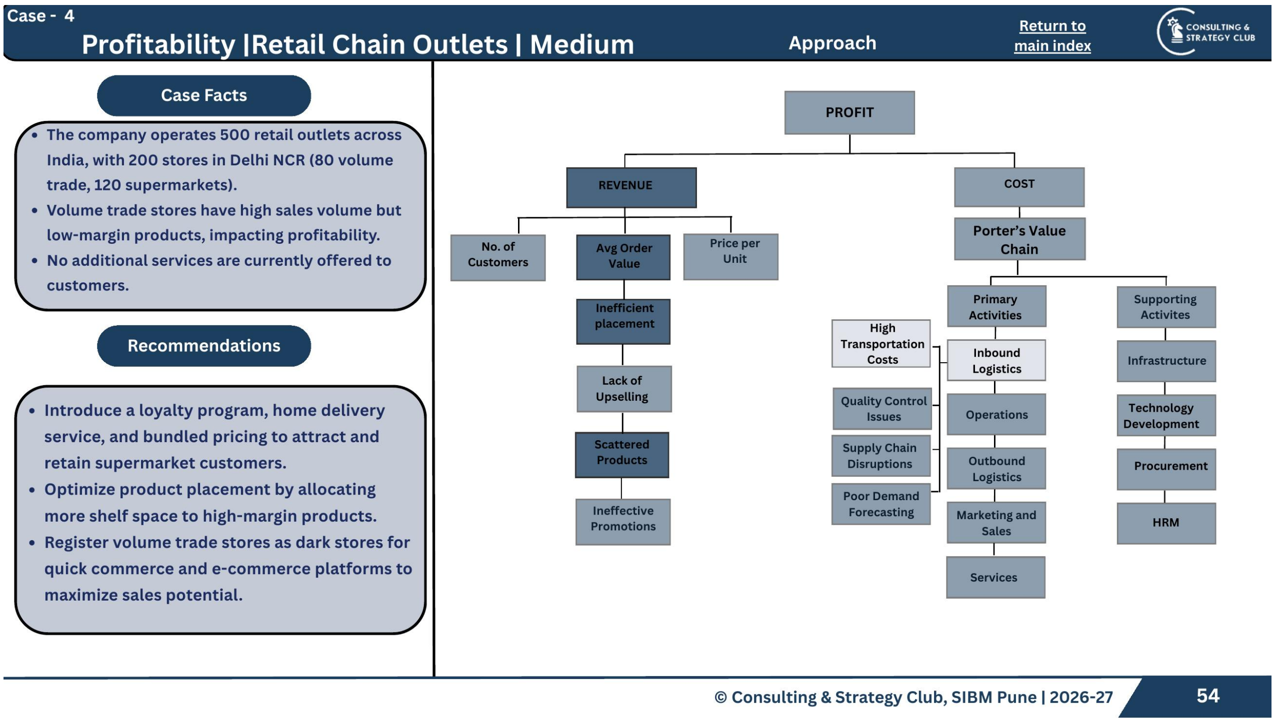
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is a company with 500 retail outlets across the country. In some outlets, sales are increasing, but the bottom line is decreasing. As a sales manager, you have been tasked with suggesting measures to the CEO on how to address this issue.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

For the volume trade stores we could get them registered as dark stores for the popular e-commerce and quick commerce platforms so as to exploit the true potential of the store.

Case 5: Automotive Company

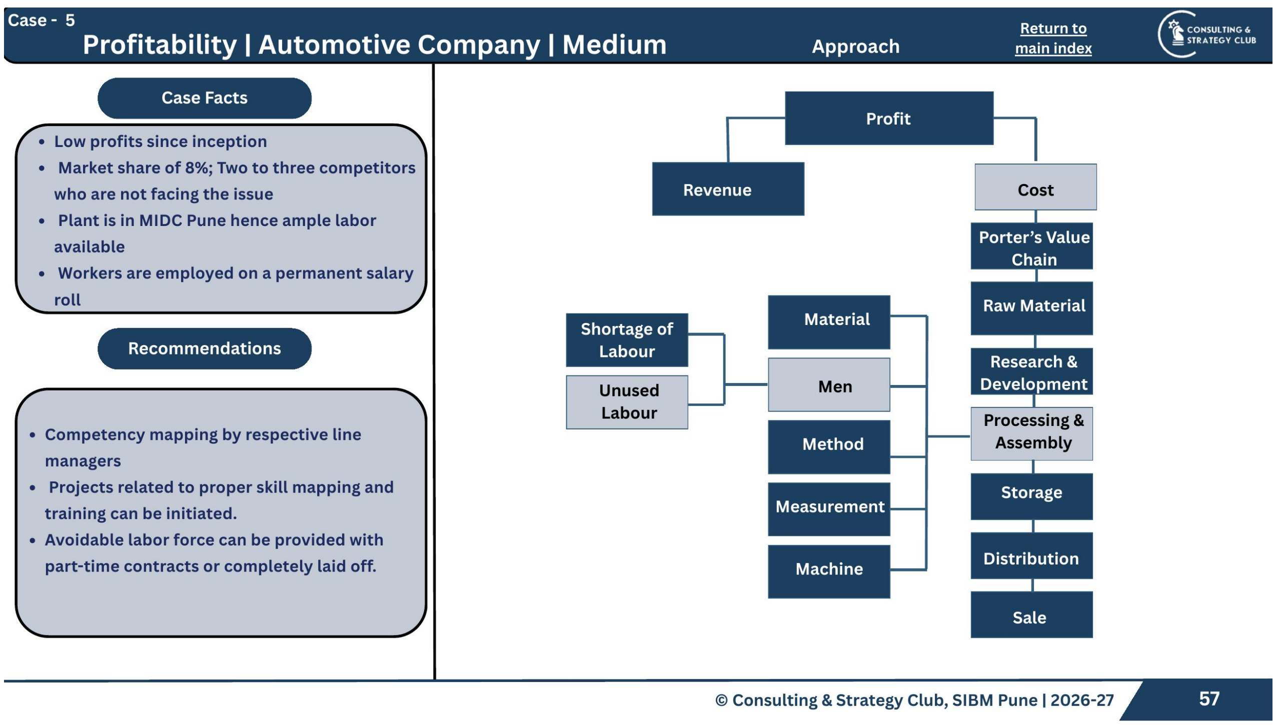
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

Your client is an automotive company which has been recently set up. The company has found their profits to be less than expected. Please find the problem areas and recommend solutions.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Great. These look like good recommendations. We can close the case now.

Case 6: Quick Commerce

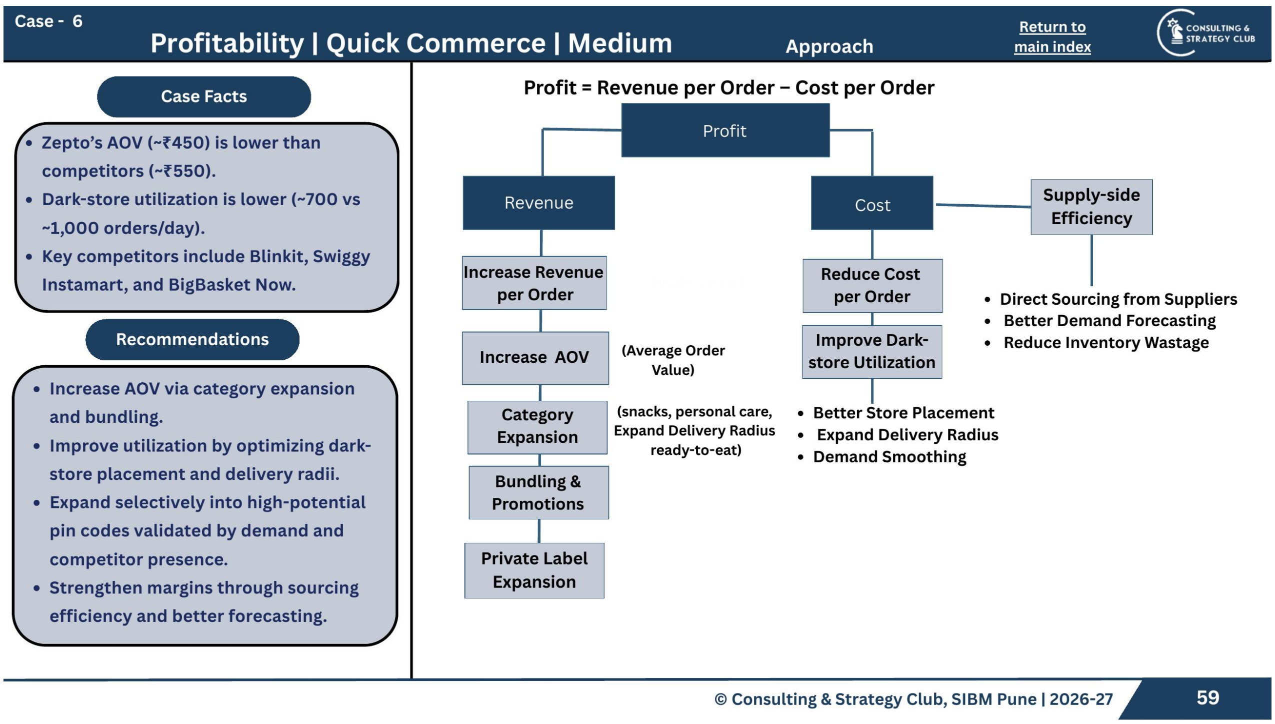
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is Zepto, a quick commerce startup operating in major Indian metros.
While the company has achieved strong order volumes, profitability remains a concern. Zepto wants to drive sustainable growth over the next two years. How would you approach this?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

I would recommend a benchmark-driven growth strategy that increases average order value through category expansion and bundling, improves dark-store utilization to lower fixed costs per order, expands selectively into high-potential pin codes, and strengthens margins through sourcing efficiency and private-label expansion. This approach enables Zepto to scale sustainably while moving closer to profitability.

Case 7: Bank

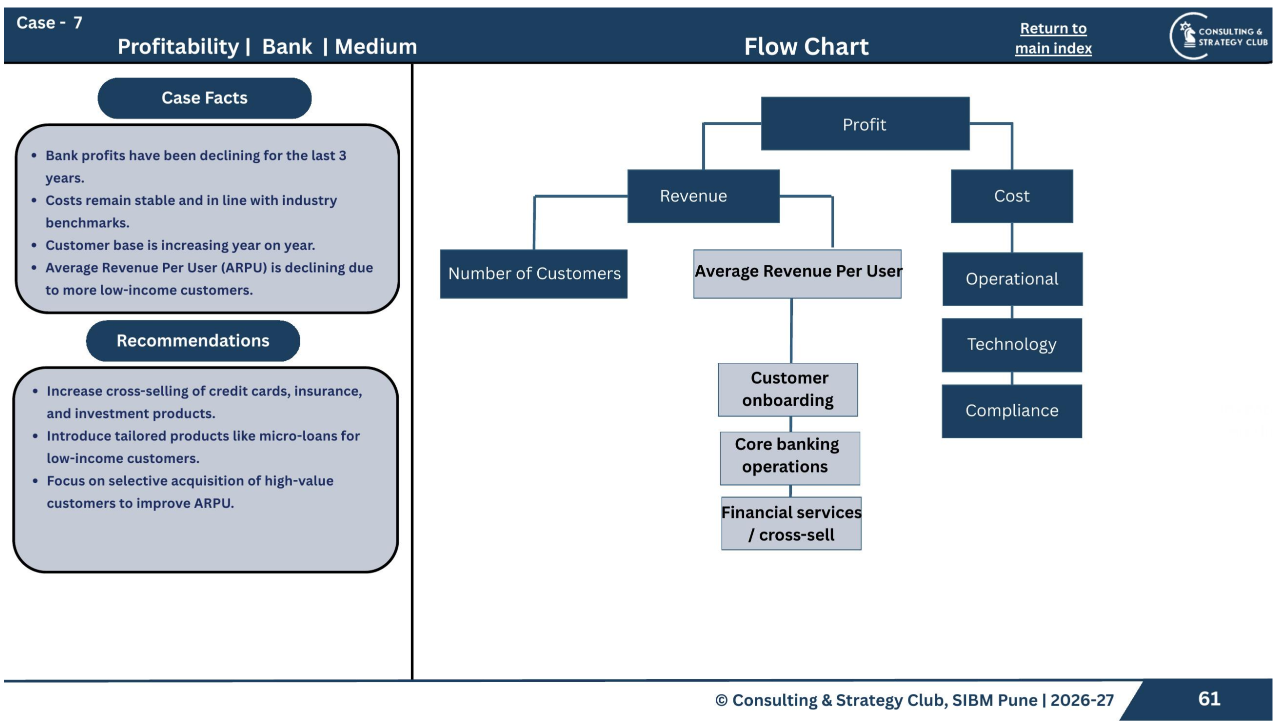
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

Your client is a national retail bank with around 40 million customers. Over the last 3 years, the bank has seen a consistent decline in profits. They want to understand the root cause. Please help diagnose the situation.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

I would recommend a three-part strategy to improve profitability.
First, the bank should increase cross-selling of products like credit cards, insurance, and investment products to existing customers. Second, it should develop products for low-income customers, such as micro-loans and small-ticket financial services, to increase revenue from this segment. Third, the bank should target selective acquisition of high-value customers to improve the customer mix and increase ARPU.

Case 8: Online Platform

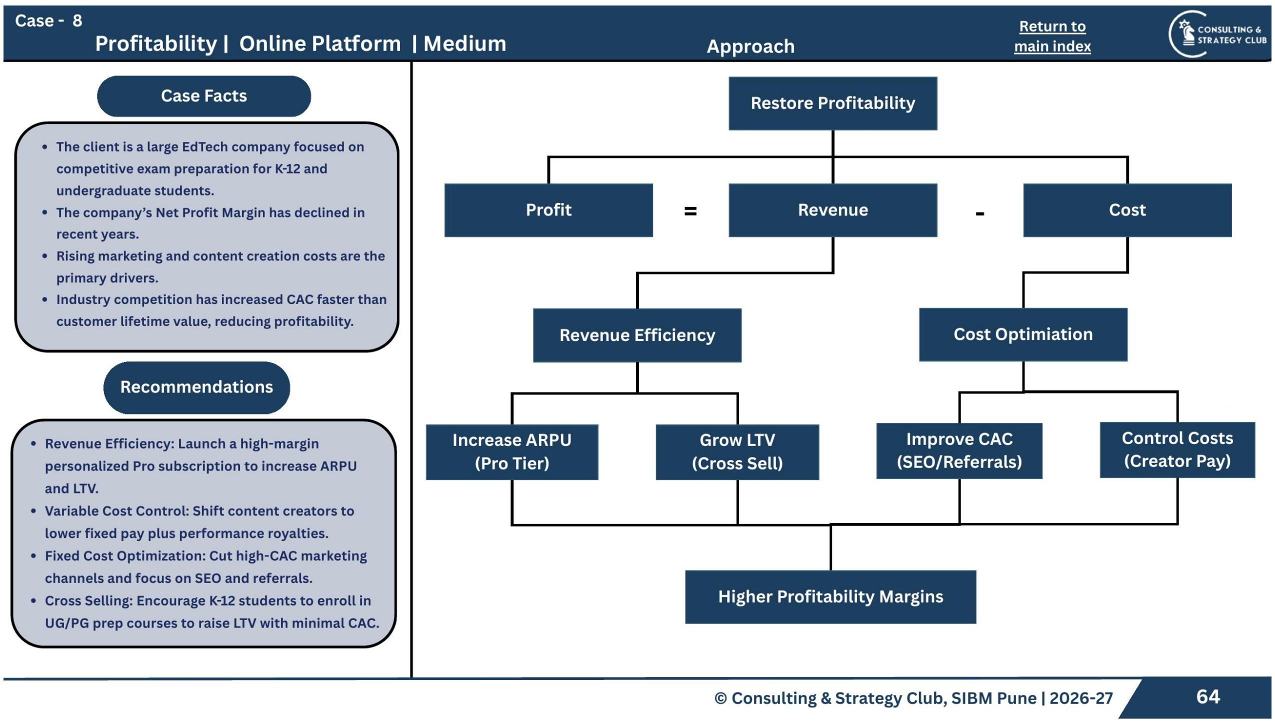
Profitability Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is VedantaLearn, a large online learning platform. The company enjoyed high revenue previously but its profitability has significantly declined in the last few years. Their leadership wants to bring profit margins back up. Please proceed with your analysis.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

In order to bring in profitable new customers, we can:

1) Focus on SEO and user referral programs with strong incentives, which have a lower inherent CAC.

2) Segment and target the urban, high intent demographics who are willing to pay a premium for the new 'Pro' tier.

3) Leverage our existing profitable UG/PG segment through targeted cross selling campaigns to secure the next wave of customers (K 12) with near zero CAC. This will help increase profitability and restore VedantaLearn's profit margins.

Market Entry Framework Cases

Case 1: Netflix Company

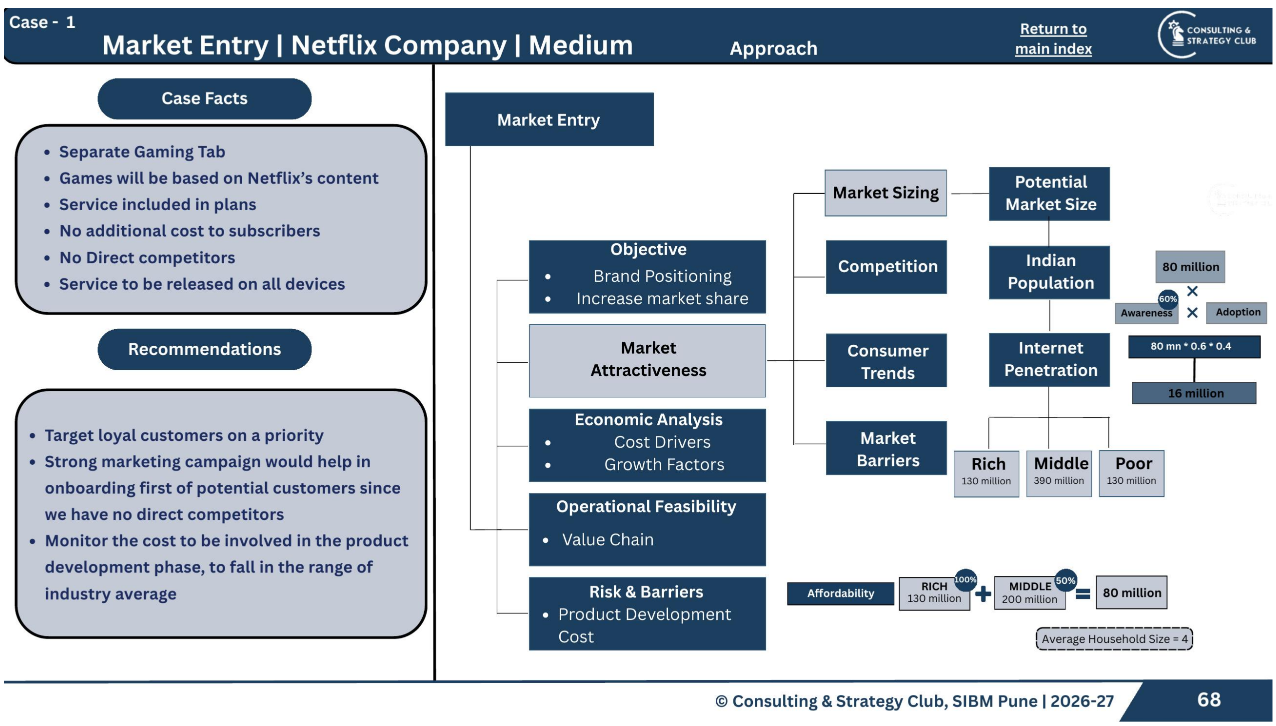
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

Netflix Strategy Team wants to explore the gaming segment in India and wants your opinion on whether they should enter the market or not.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Currently, the client has no internal as well as external barriers and has deep pockets to cover the initial capital investment. Hence if the cost involved in game development is as per the industry average, Netflix should go ahead with the launch of this gaming platform.

Case 2: Quick Commerce

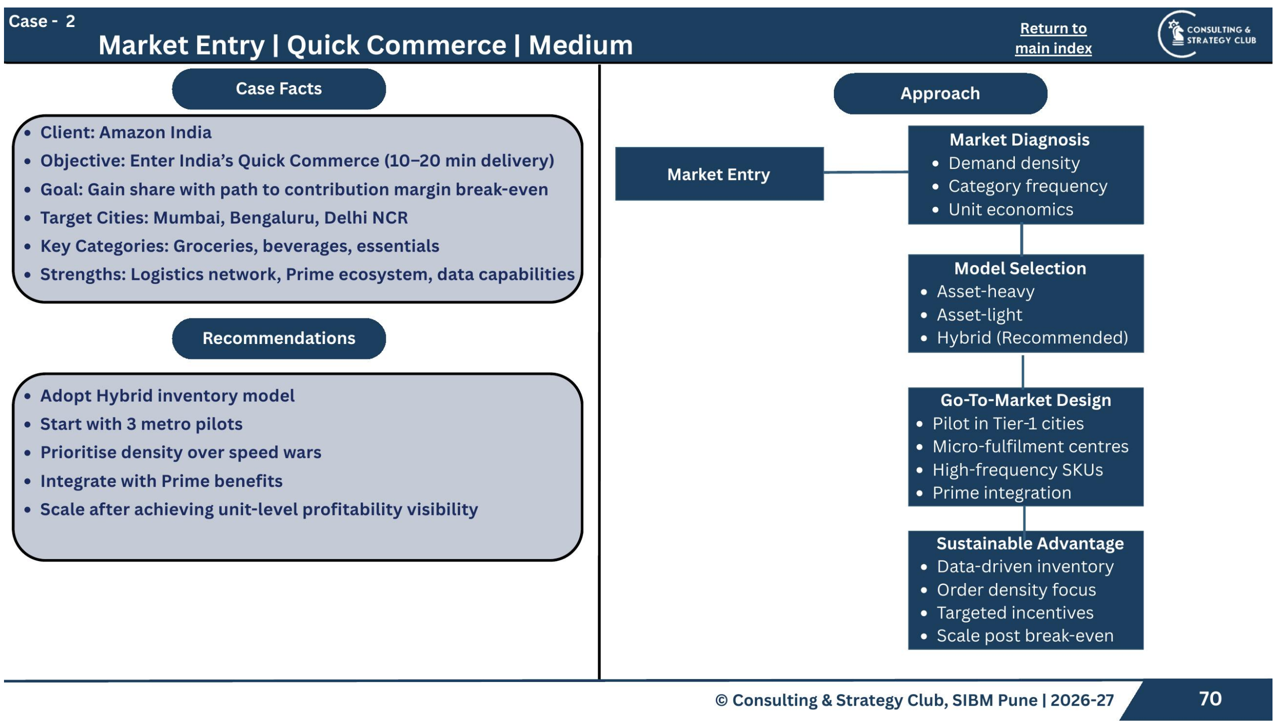
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

Welcome to the case round. Your client is Amazon, which is evaluating entry into India's quick commerce market. Your task is to design a step-by-step strategy for entry and scale. Shall we begin?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Sir, Amazon should enter Q-commerce via a hybrid model, pilot in top cities, maintain SKU discipline, and leverage Prime, logistics, and data to build a defensible, profitable business rather than chasing speed alone.

Case 3: Cosmetic Company

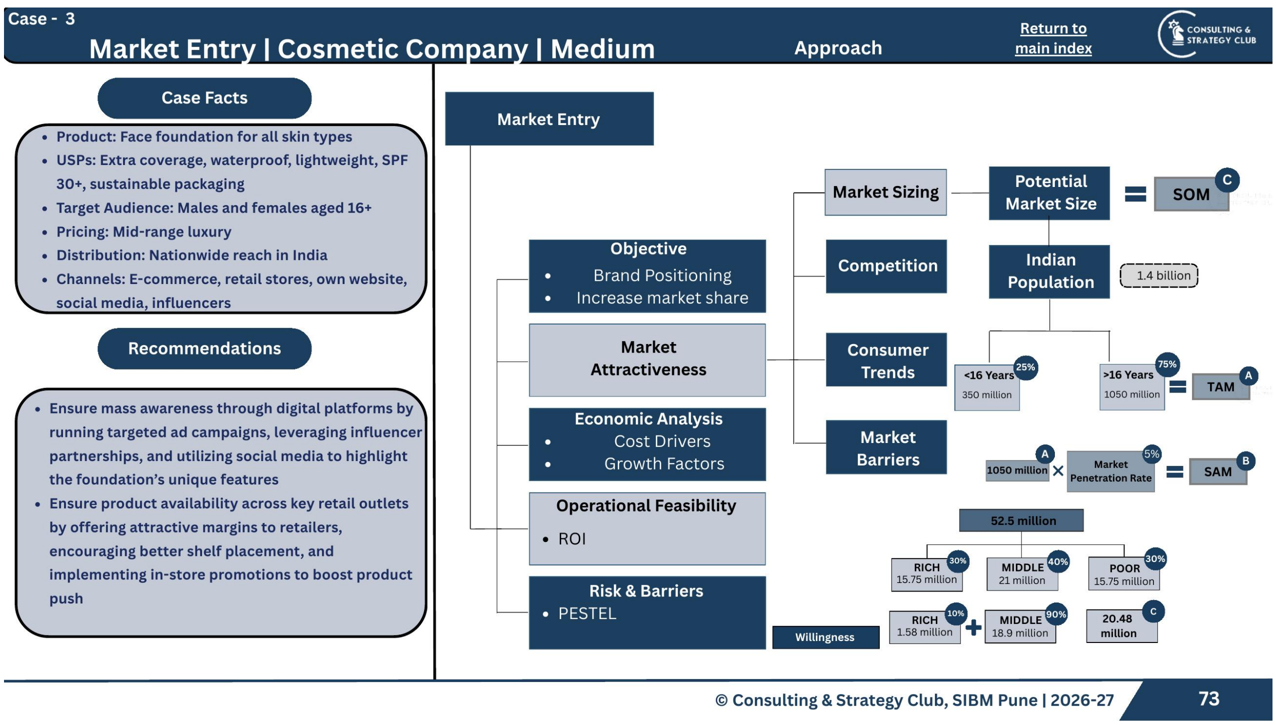
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

Thank you for joining us today. BrewyBright is considering launching a new product in the Indian market. Your task is to evaluate whether this is a lucrative opportunity and recommend effective channels to reach the target audience. Let’s begin. Do you have any initial questions to understand the product and the company better?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Yes, BrewyBright should launch its face foundation in India, targeting 20.48 million users. The company should drive mass awareness through digital platforms and ensure product availability across retail outlets by offering attractive margins and in-store promotions to boost sales.

Case 4: Pernod Ricard

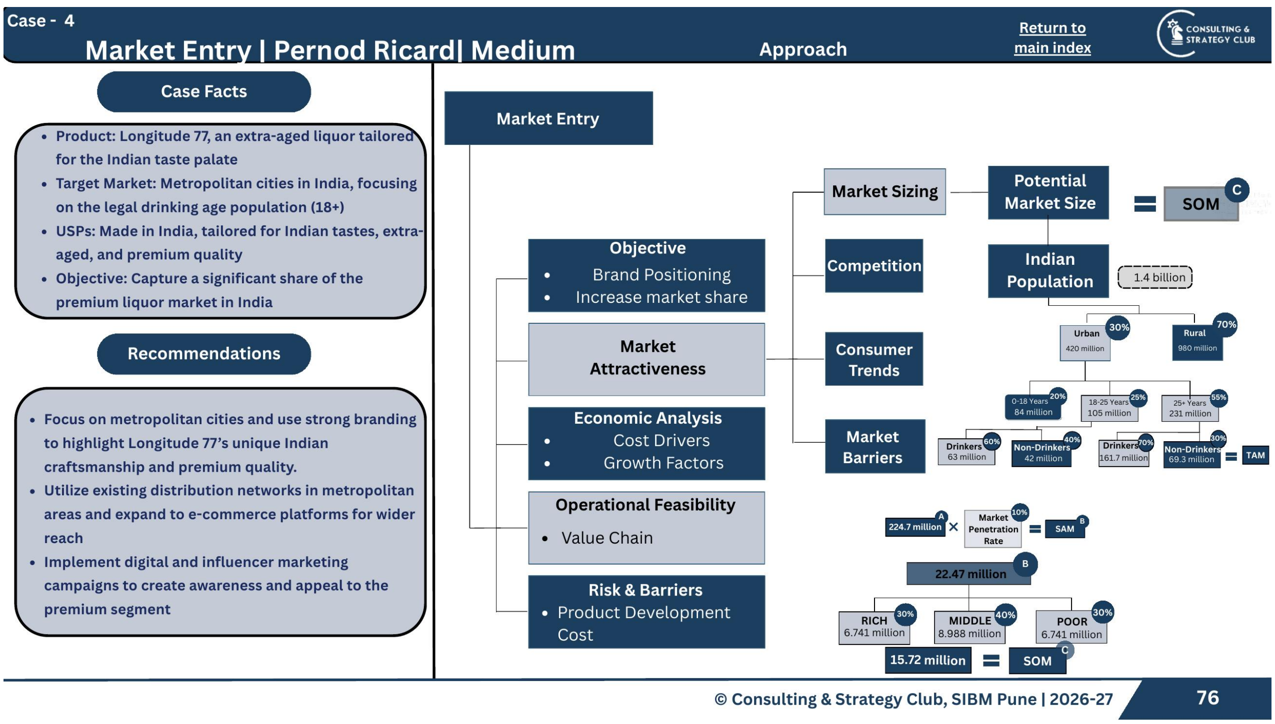
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

Thank you for joining us today. Pernod Ricard has developed a new product called Longitude 77 and is considering its market entry in India. Your task is to evaluate whether this is a lucrative opportunity and recommend effective strategies for market entry. Let's begin. Do you have any initial questions to understand the product and the company better?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Yes, Pernod Ricard should proceed with the launch, leveraging its strong brand reputation and the growing demand for premium, uniquely tailored products. Continuous monitoring of sales performance and customer feedback will be crucial for making necessary adjustments post-launch.

Case 5: Veda Skin

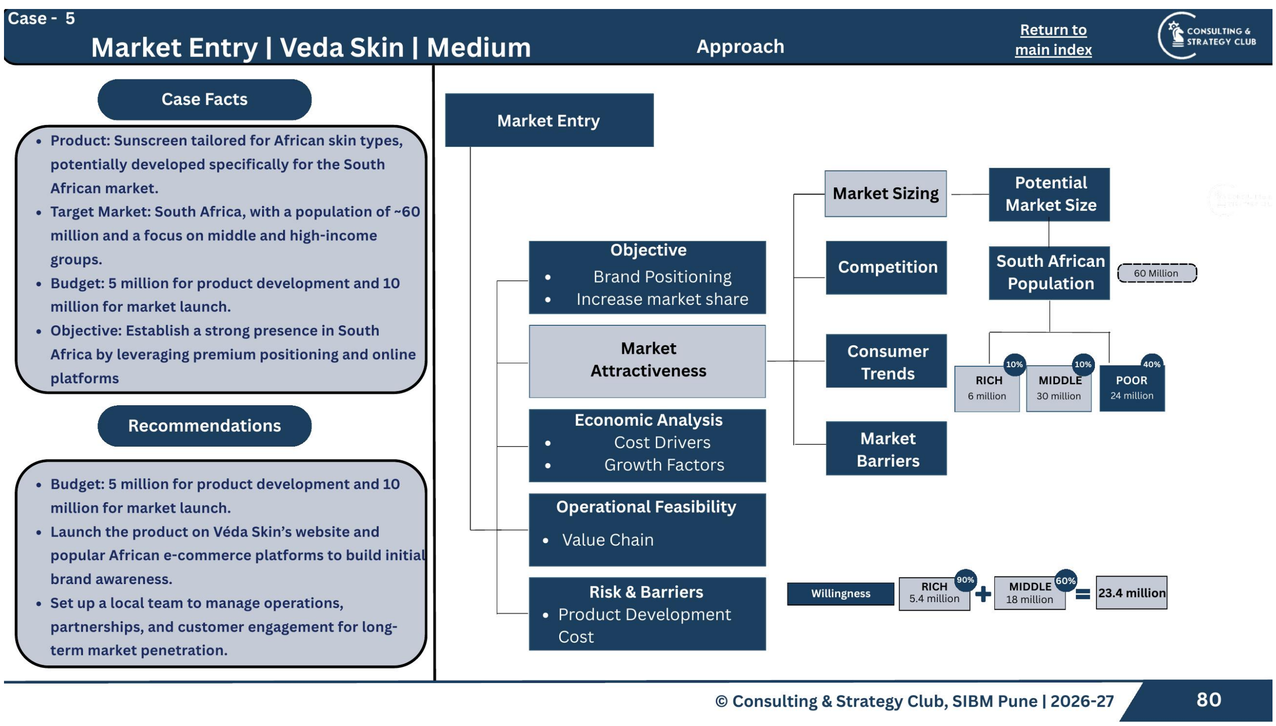
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

Thank you for joining us today. Véda Skin is considering entering the South African market with a sunscreen product. Your task is to first analyze the risks involved with entering into a new macroeconomic environment and then evaluate whether this is a viable opportunity and recommend the best way forward. Let's begin. Do you have any initial questions to understand the company and the market better?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Yes, I recommend investing in research and development to develop a sunscreen product specifically suited for African skin types. For the initial launch, focus on online platforms, including Véda Skin's website and popular African cosmetic e-commerce platforms, to gauge customer response and build brand awareness.

Case 6: Open AI

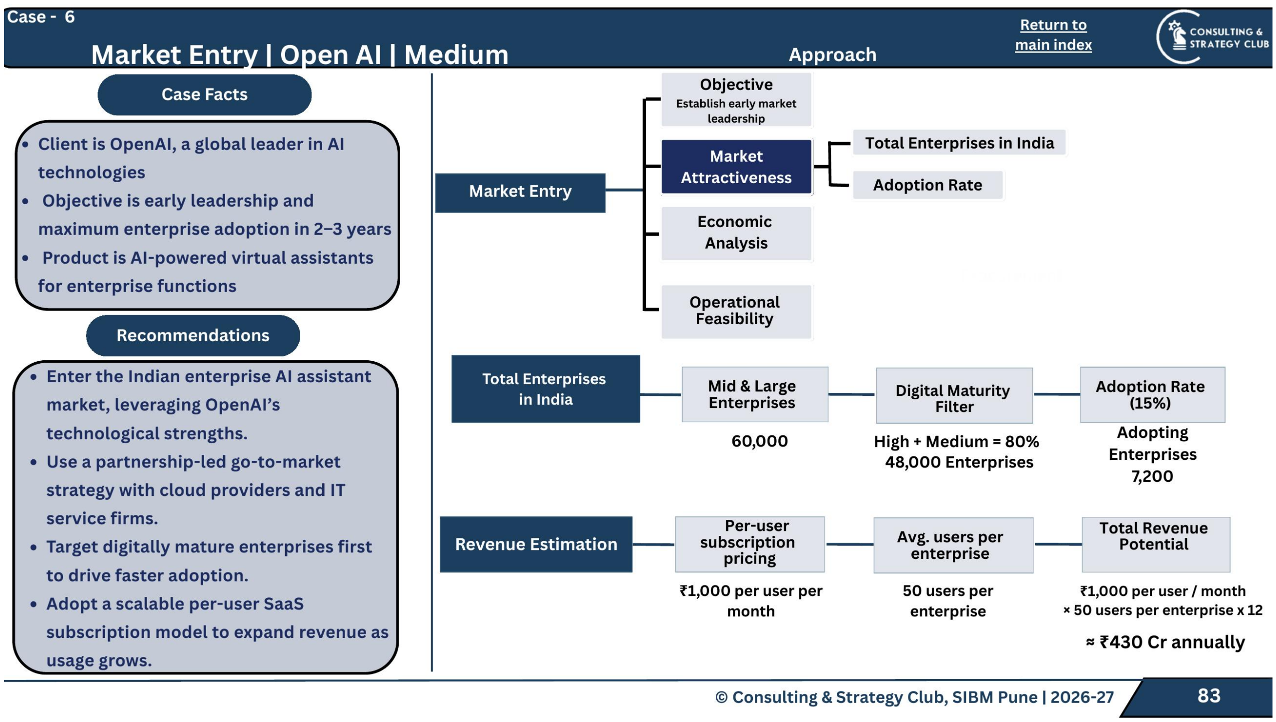
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

OpenAI wants to explore launching AI-powered virtual assistants for enterprises in India. These assistants would support functions like HR, finance, and customer support. Should OpenAI enter this market?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

I would recommend that OpenAI enter the Indian enterprise AI assistant market.
The market is attractive with an estimated ₹430 crore annual revenue potential, enterprise digitization is accelerating, and OpenAI has a clear technology advantage.
A phased, partnership-led rollout, starting with IT services and BFSI, would help drive early adoption and long-term scale.

Case 7: European Niche Perfume Brand Entering India

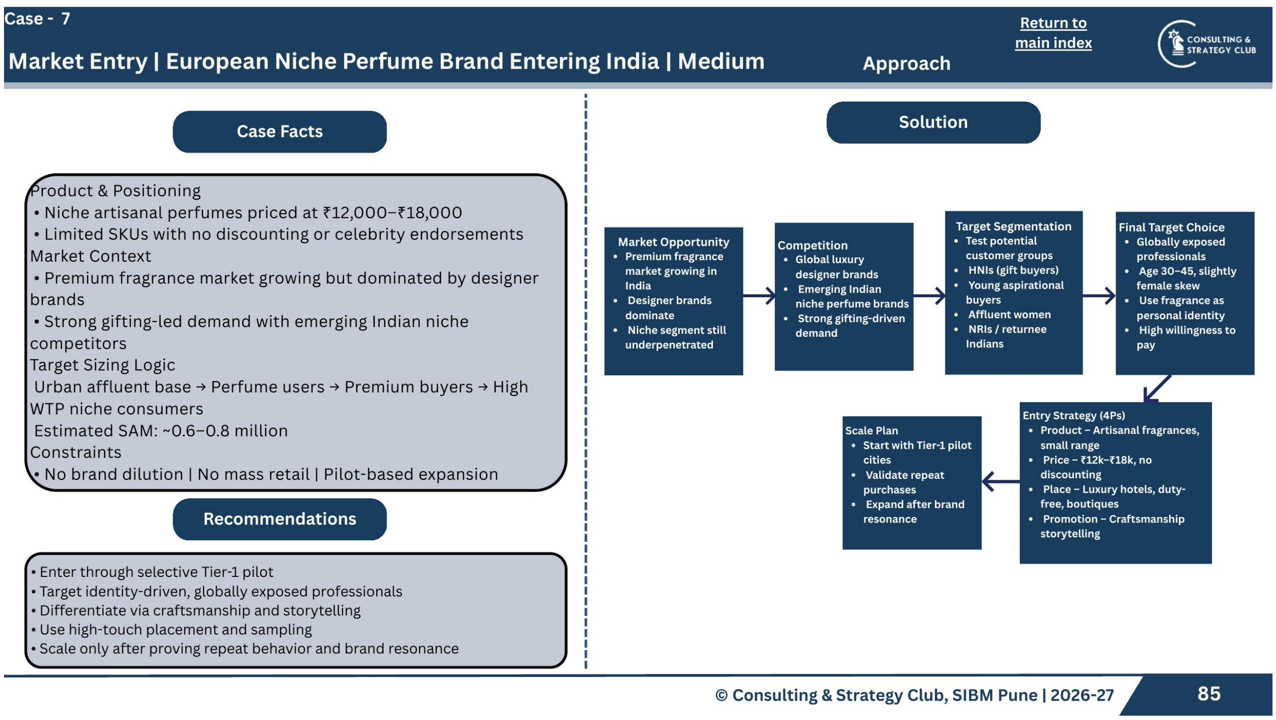
Market Entry Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is a European niche perfume brand planning to enter India. They’re unsure who to target and how to enter without diluting their brand. How would you approach this?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Start with a controlled pilot in Tier-1 cities.
Position as a signature identity scent.
Use selective channels: luxury hotels, duty-free, private boutiques.
Promotion should focus on sampling and storytelling, not mass advertising.
Maintain global pricing and avoid discounting.
Scale only after repeat purchase is visible.

Pricing Framework Cases

Case 1: Pharmaco

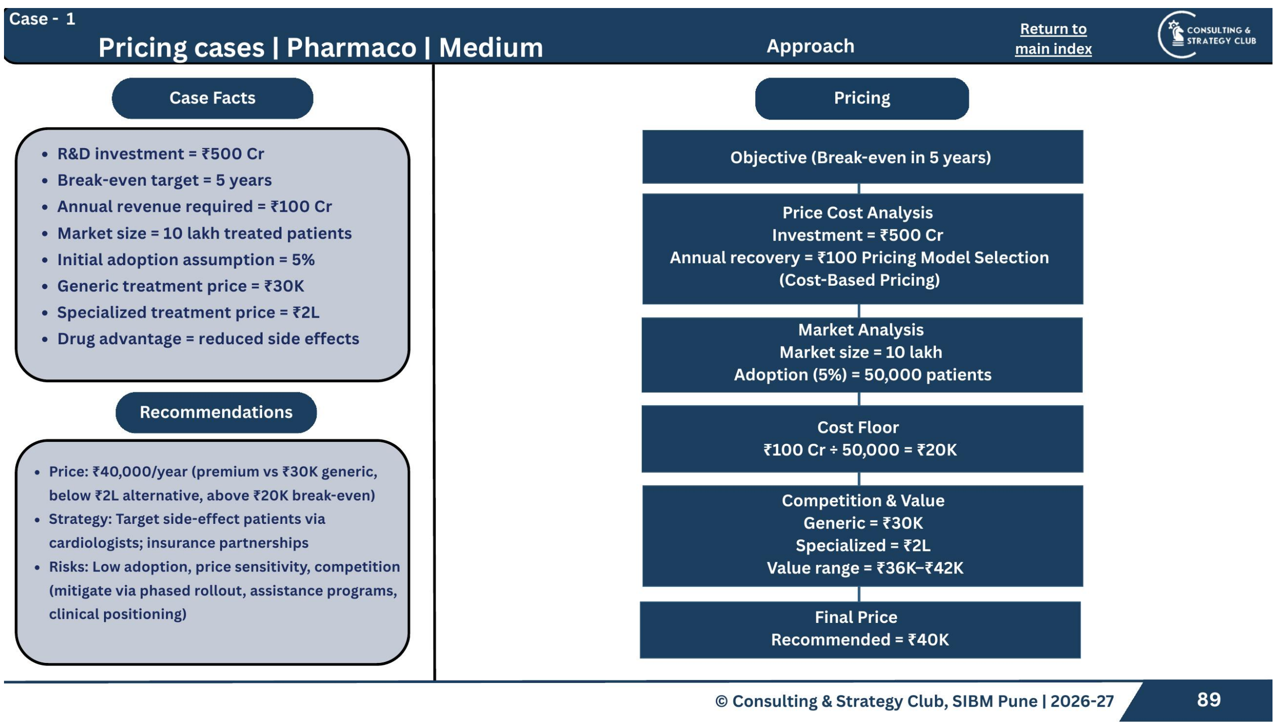
Pricing Framework · Difficulty: Medium

PROBLEM STATEMENT

PharmaCo has developed a breakthrough drug for chronic heart disease that eliminates severe side effects of current treatments. The company wants to determine the best pricing strategy for India. How would you proceed?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Yes.
If 50,000 patients adopt:
Annual revenue:
50,000 × ₹40,000
= ₹200 Cr
Over 5 years:
₹200 Cr × 5
= ₹1,000 Cr
This exceeds the ₹500 Cr investment, so break-even appears achievable even with conservative adoption.

Case 2: FRESHEN - Beverage Company

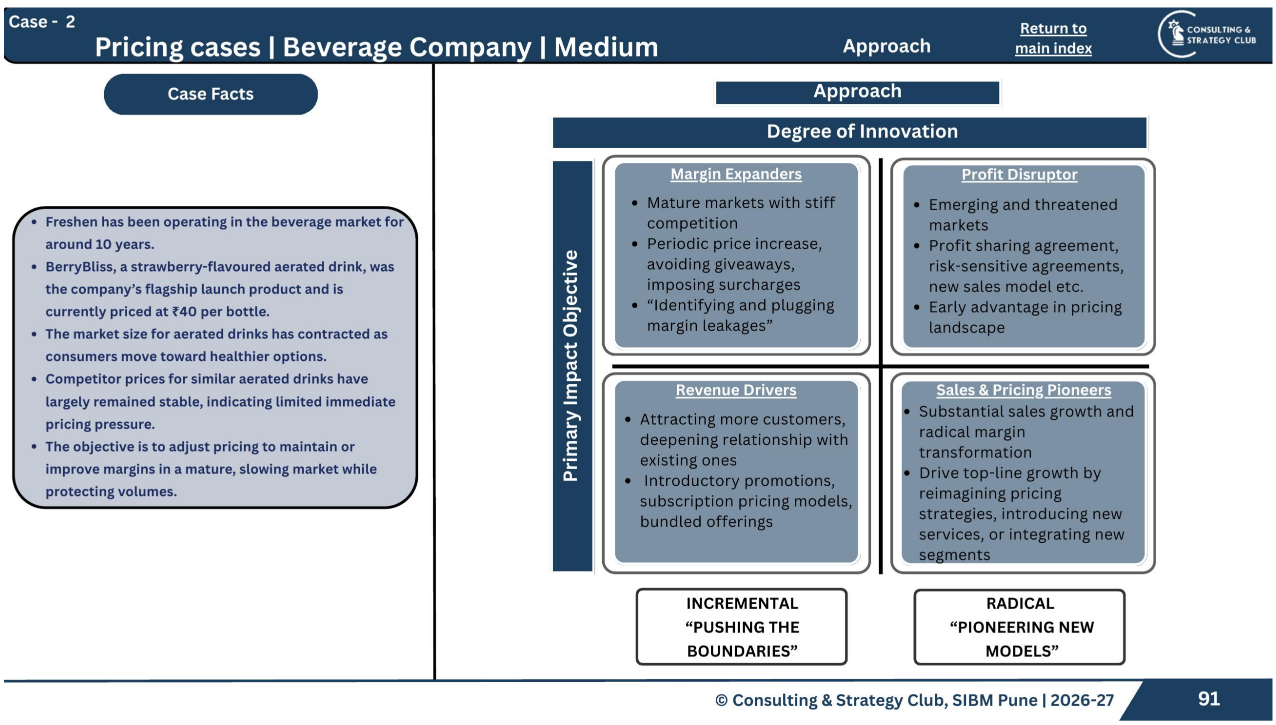
Pricing Framework · Difficulty: Medium

PROBLEM STATEMENT

Good morning. Today we are having a discussion about a beverage company, Freshen, that wants to revise the pricing strategy for one of its aerated products. How would you proceed with this?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

In line with the structure, Freshen has to position itself further as a margin extender and implement strategies on how to make profit consistent. The modalities include the following:

Regularly stagger price increases without damaging any noticeable level of demand in dealing with the rising costs.

No unnecessary giveaways or discounts that would erode customer margins.

Impose surcharges where applicable, such as premium packaging or variants.

Identify and fill leakage sites for margins by optimizing promotions, reducing inefficiencies, and improving cost structures.

Case 3: EV Battery Subscription

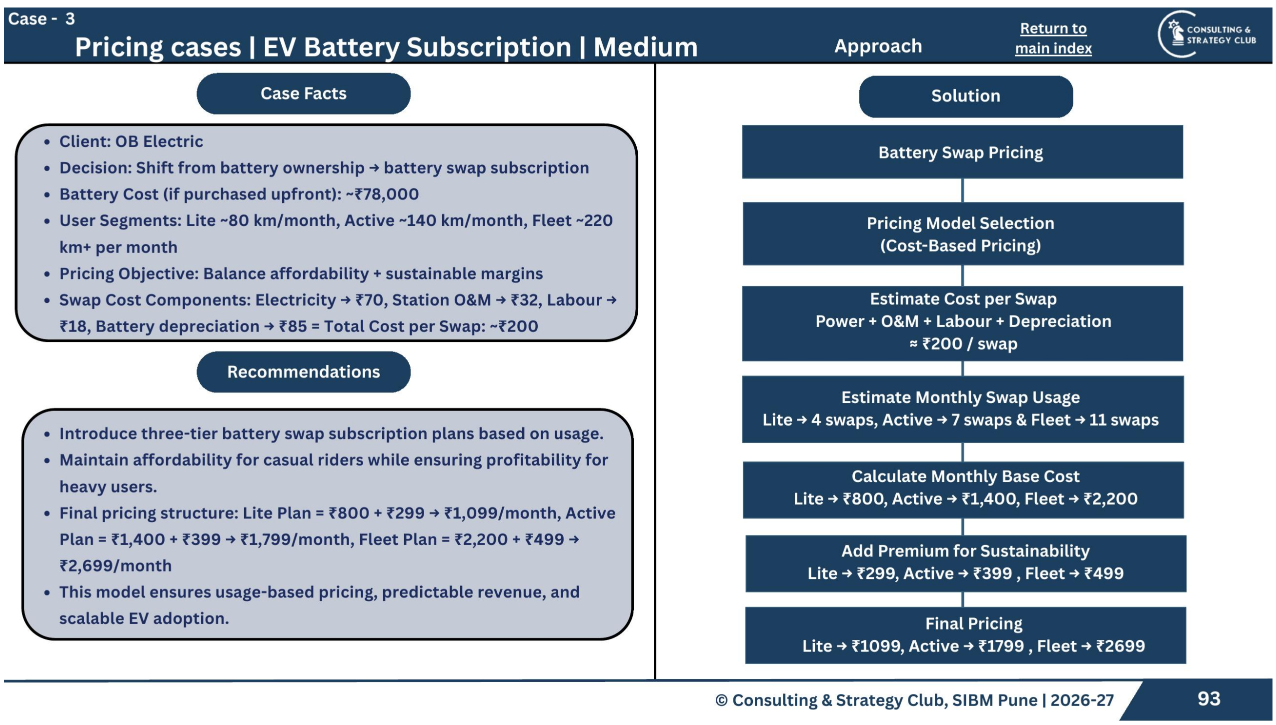
Pricing Framework · Difficulty: Medium

PROBLEM STATEMENT

Today’s scenario involves OB Electric, which is considering shifting from battery ownership to a monthly battery swap subscription model. Instead of purchasing a battery upfront, riders would pay a recurring fee to swap batteries when needed.
Your task is to design a pricing structure for different user segments. Shall we begin?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

To summarize, OB Electric can introduce a three-tier battery swap subscription model based on usage intensity:
Lite: ₹1,099/month | Active: ₹1,799/month | Fleet: ₹2,699/month

Case 4: Cloud Kitchen

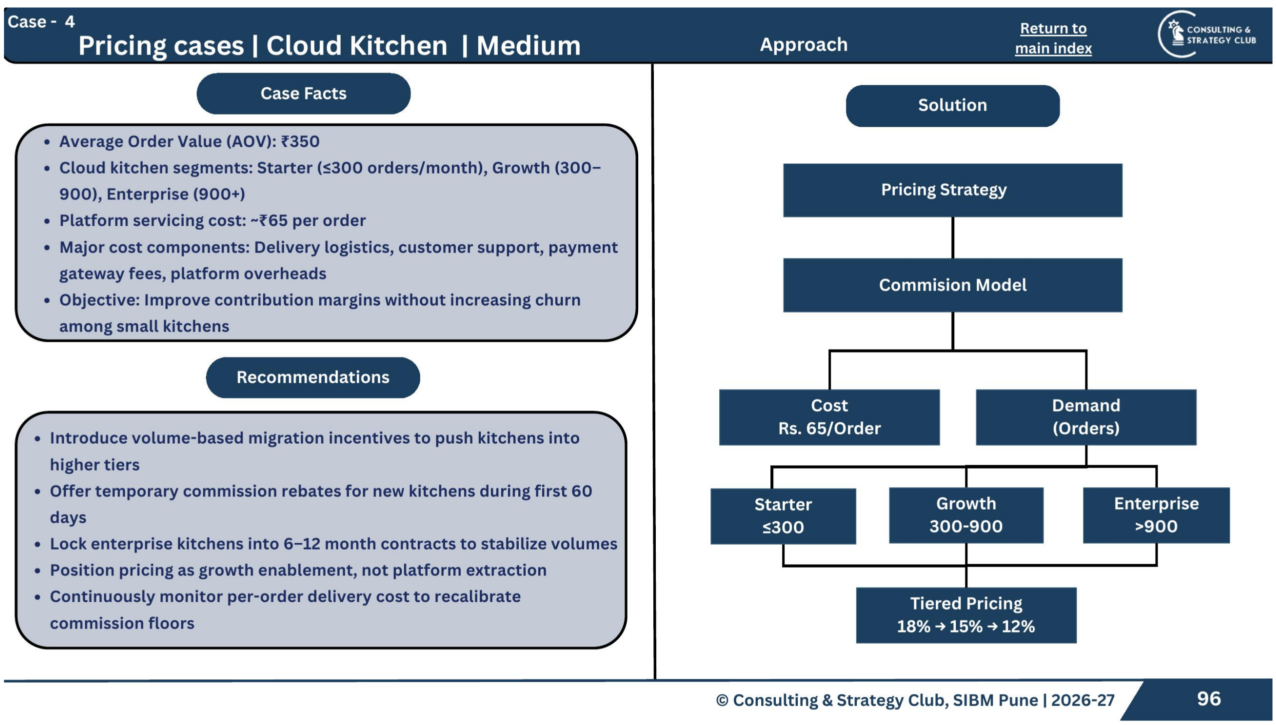
Pricing Framework · Difficulty: Medium

PROBLEM STATEMENT

Welcome to the case round. Today's scenario involves Zomato. The company is revisiting its commission structure for cloud kitchens listed on its platform. Your task is to design a pricing framework for different kitchen segments. Shall we begin?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

To summarize sir, a volume-linked commission structure allows Zomato to protect unit economics, retain small kitchens, and incentivize growth onto higher-margin tiers.

Case 5: Ink Cartridge

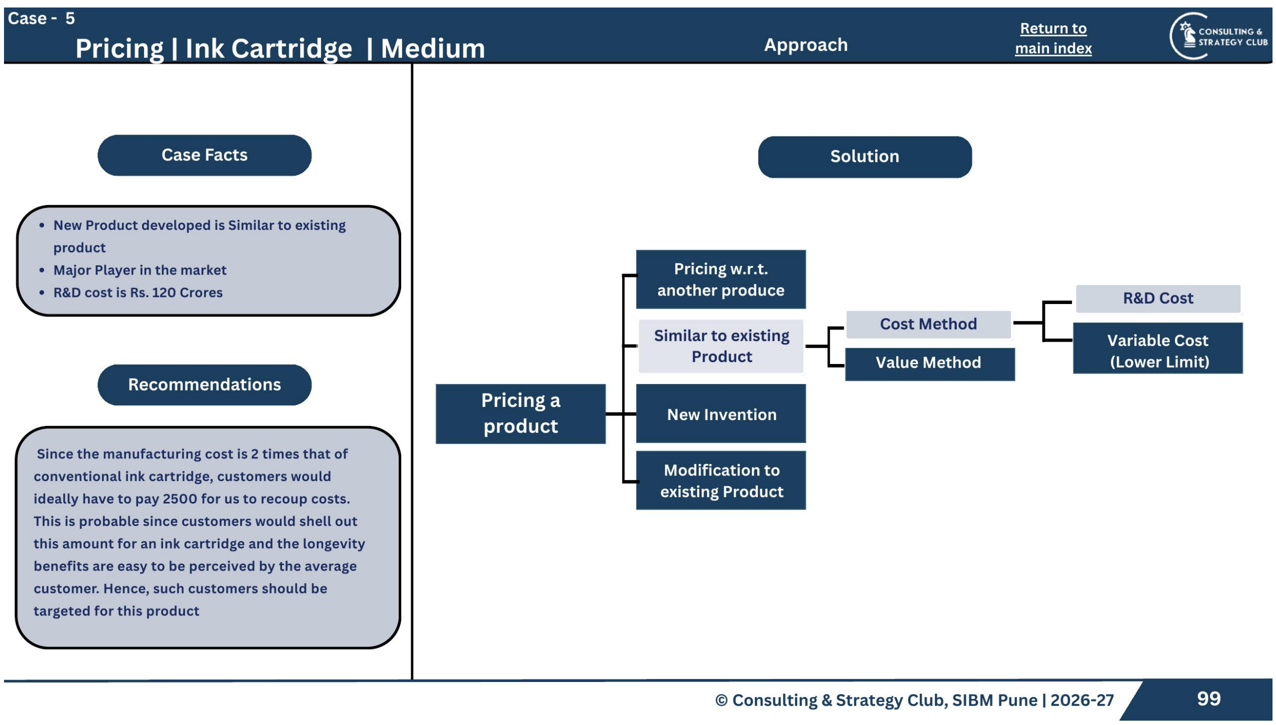
Pricing Framework · Difficulty: Medium

PROBLEM STATEMENT

Suppose there is a company that manufactures printing cartridges and its R&D division came up with a new type of cartridge whose ink lasts three times more than normal cartridges. Should they enter the market and what should be the pricing of the new product.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

These customers incur an additional expense of maintenance and changing of the light ink cartridges and maintaining staff for it etc. If we can sell this product to them, they will save on these additional costs and will not have to worry about maintenance at all Estimating that these ink cartridges are available for Rs. 1800 to the city, we can have a mark-up over this and sell each ink cartridge at Rs. 2500 each. They would recover the amount in two years and we can use this price-based costing to get a very good profit It is important that we make a good profit on this product because for every sale of a new technology-based ink cartridge, we are losing the sales for 2 conventional ink cartridges.

Case 6: Drone Delivery

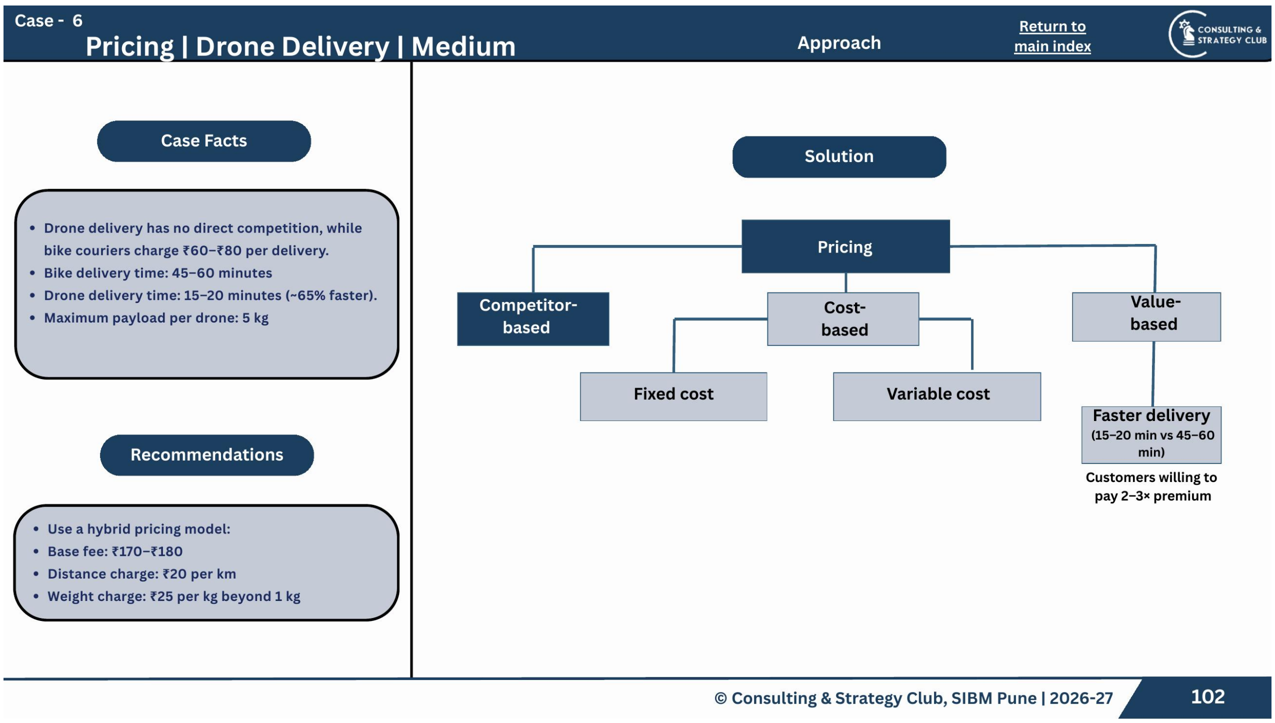
Pricing Framework · Difficulty: Medium

PROBLEM STATEMENT

Your client is a drone-delivery startup. They want to design a pricing model that ensures profitability. Help them design it.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Based on the cost analysis and value provided, I would recommend a hybrid pricing model with a base fee of ₹170–₹180, a distance charge of ₹20 per km, and a weight charge of ₹25 per kg beyond the first kilogram. For example, a 3 kg parcel over 4 km would cost about ₹310, which is above the ₹172 break-even cost, allowing the company to maintain a healthy margin.

Growth Framework Cases

Case 1: Unique Textiles Pvt. Ltd.

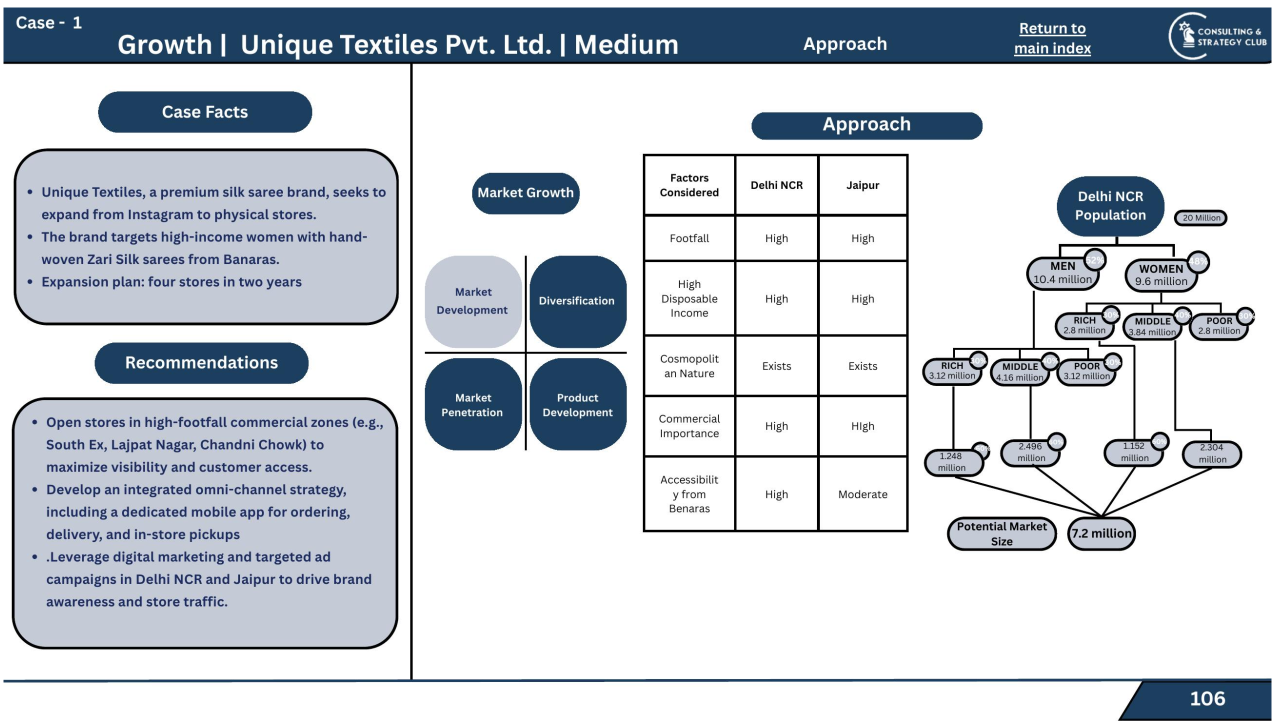
Growth Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is Unique Textiles and its primary business is to manufacture and sell silk sarees, and currently, we operate solely through our Instagram account/Online Channel. They're now looking to expand into physical stores. Can you suggest a strategy for an omni-channel presence?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Both offline and online channels should have the synergy and maintain availability of the products. We can create an application for ordering, delivering and collecting sarees so that we don't lose out on opportunities. Also run ad campaigns in Delhi and Jaipur to increase the awareness of your offline presence.

Case 2: D2C Market Growth

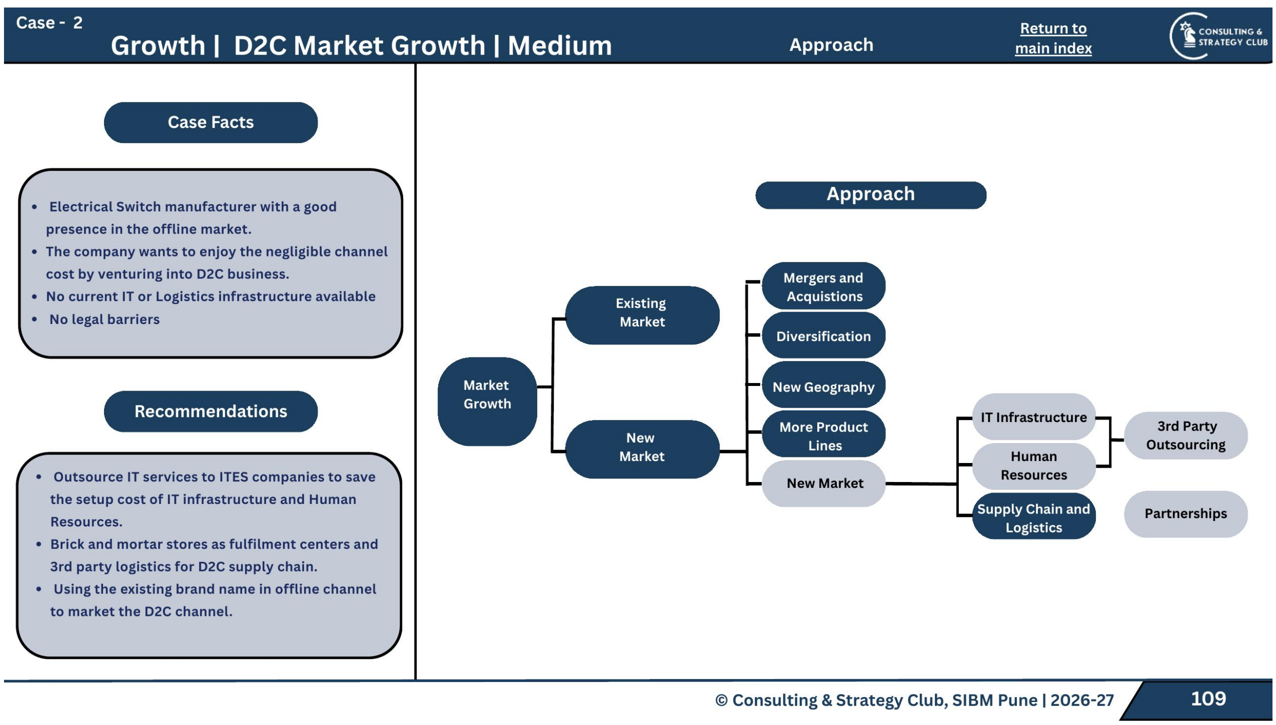
Growth Framework · Difficulty: Medium

PROBLEM STATEMENT

There is an electrical Switch Manufacturing Company with a significant presence in the offline market and wants to enter the D2C Online market. As a consultant, what will be your entry strategy and should they go about it?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

The company will have to spend to promote their D2C channel and this will also include the marketing costs. As we already have stores and third party vendors, we can use the same for offline marketing of our D2C website/app. Online marketing expenditure will have to be taken care of.

Case 3: Supply Chain Company

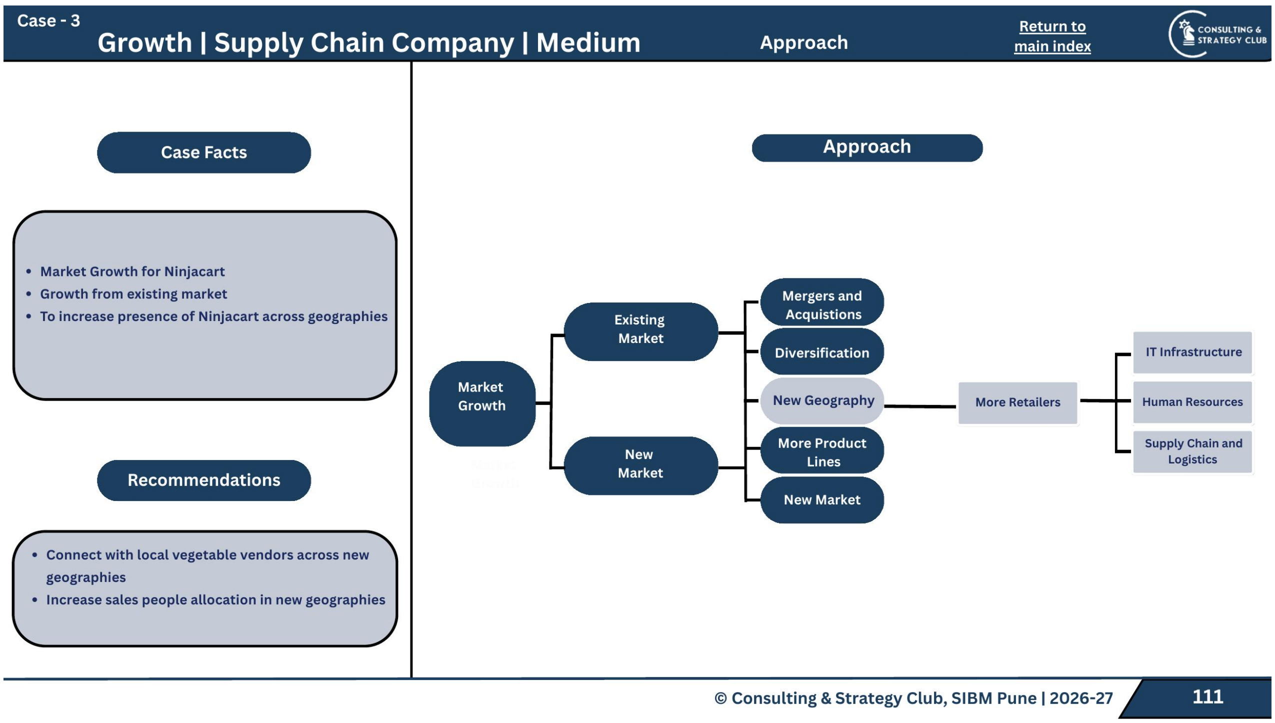
Growth Framework · Difficulty: Medium

PROBLEM STATEMENT

Our primary business is to distribute vegetables from farms to retailers. We are looking to grow in this segment. You are required to suggest ways in which we can grow?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

As this is a B2B mode, we will have to hire salespersons and reach out to retailers personally, so that we can gain their trust.

Case 4: Telecom Company

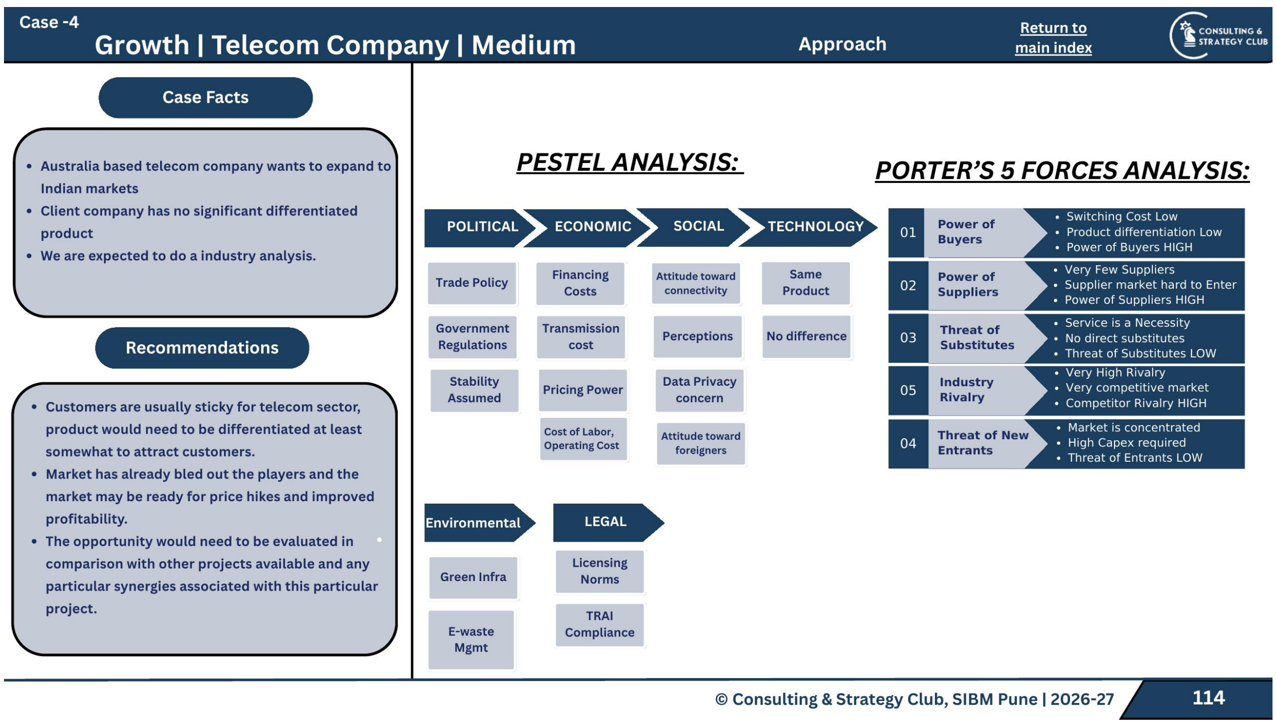
Growth Framework · Difficulty: Medium

PROBLEM STATEMENT

An Australian Telecom Company wants to grow in the Indian Market, should it enter the market given the current market scenario? Do an analysis.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Sir, we should enter the market if we have deep pockets and can afford an initial price war since that is still a possibility. However, it would be better if we could differentiate our product because again from our analysis, the industry has a lot of negatives which might as well be a cyclical thing. So, considering that the trend is cyclical, the industry may be on the rise and it could be good to enter the industry.

Case 5: Food and Beverage Company

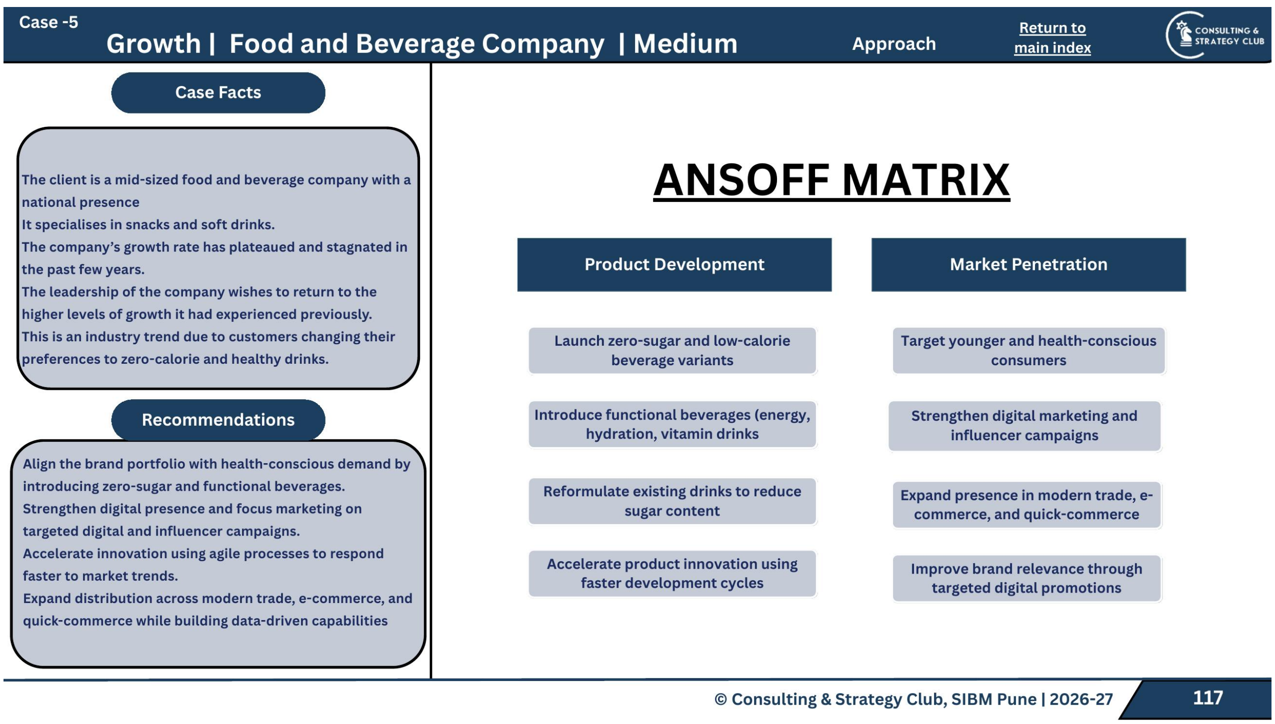
Growth Framework · Difficulty: Medium

PROBLEM STATEMENT

Our client is AgroGems, a mid-sized food and beverage company specialising in snacks and soft drinks with a national presence. The company enjoyed high growth previously but it has now plateaued and stagnated in the last 2–3 years. Their leadership wants to bring growth back to the higher levels of growth experienced previously . Please proceed with your analysis.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

In order to bring in new customers, we can:
Segment potential customers—especially urban, health focused, younger demographics.
Launch zero-sugar, low-calorie, and functional beverages.
Target customers who have recently increased spending on healthier food categories.
Using a Market Penetration strategy, we will use influencer marketing, fitness collaborations, and digital ads to rebuild brand relevance among these segments. This will help increase revenue and restore AgroGems' growth trajectory.

Case 6: UPI based Fintech

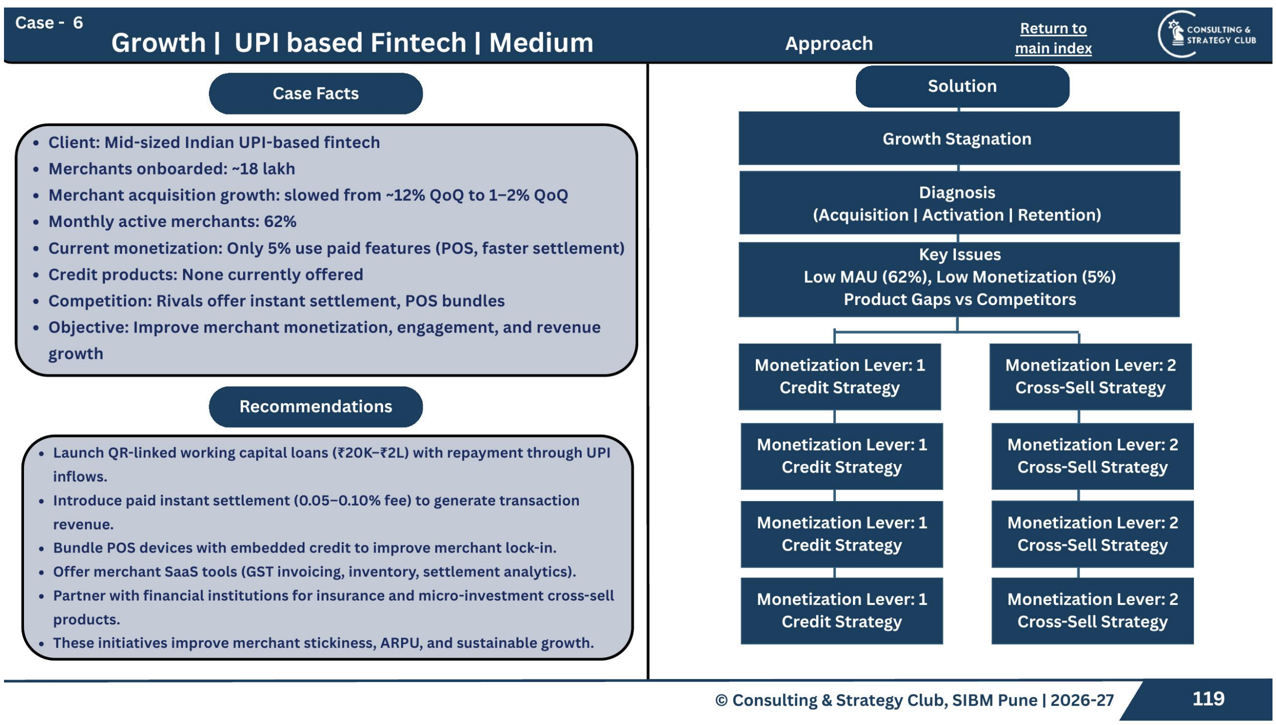
Growth Framework · Difficulty: Medium

PROBLEM STATEMENT

Today's scenario involves a mid-sized Indian UPI-based fintech. Over the last two years, merchant acquisition growth has stagnated, and the CEO believes the company has failed to monetize its merchant base effectively. They want to explore new revenue streams, particularly credit products and cross-sell opportunities, to revive growth. Shall we begin?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

To summarise, we can revive growth by deepening merchant engagement and monetization. Launch QR-linked credit, paid instant settlement, and POS-based financing, while adding SaaS tools and financial cross-sell offerings. Together, these initiatives increase merchant stickiness, ARPU, and long-term growth.

Miscellaneous Cases

Case 1: ESG Framework

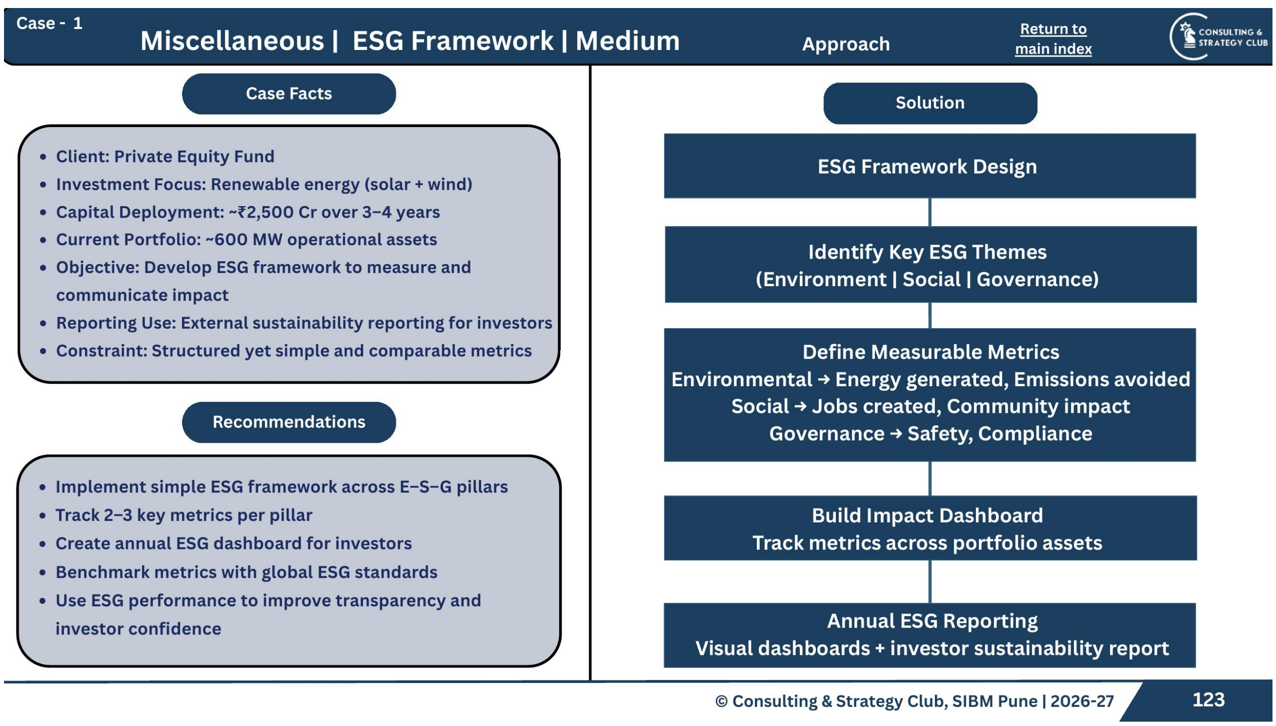
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Your client is a private equity fund investing in renewable energy assets such as solar and wind farms. The fund now wants to build an ESG and impact measurement framework to track and communicate progress. Your task is to help define this framework.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

The fund should implement a simple ESG framework built around environmental, social, and governance pillars. Each pillar can track a few key metrics such as energy generated, emissions avoided, jobs created, and safety performance. These can be reported through an annual ESG dashboard to clearly communicate impact to investors and stakeholders.

Case 2: Digital Transformation of Oral Care

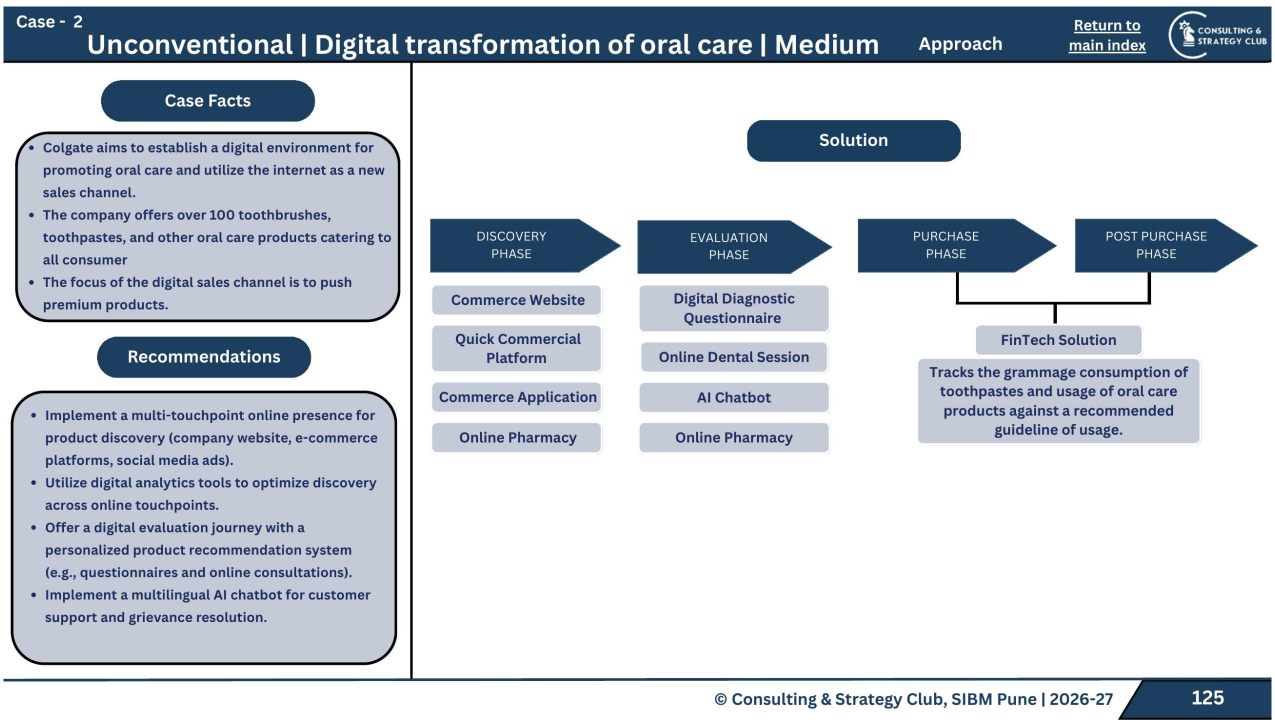
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Colgate is the biggest player in oral care with a penetration on 89% in the Indian markets. Colgate has embarked on a journey for digital transformation. Colgate wants to build a digital transformation solution. Please identify the scope of digital transformation and suggest ways in which it can be implemented.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Since you have a wide range of products catering to different oral needs, I would recommend an evaluation journey with a digital diagnosis questionnaire which would identify the correct products to suit customized consumer needs. This may also involve free online dental sessions to better recommend products. This will help the consumers to decide better in choosing our products and enhance the organisation’s vision of promoting proper oral care solutions. This also mitigates the risk of a brand switch. We can also have a multilingual AI-chatbot which caters to grievance resolution regarding our products across all geographies with lesser human interference. Are there any other challenges you are facing in this phase?

Case 3: Upskilling on a Limited Budget

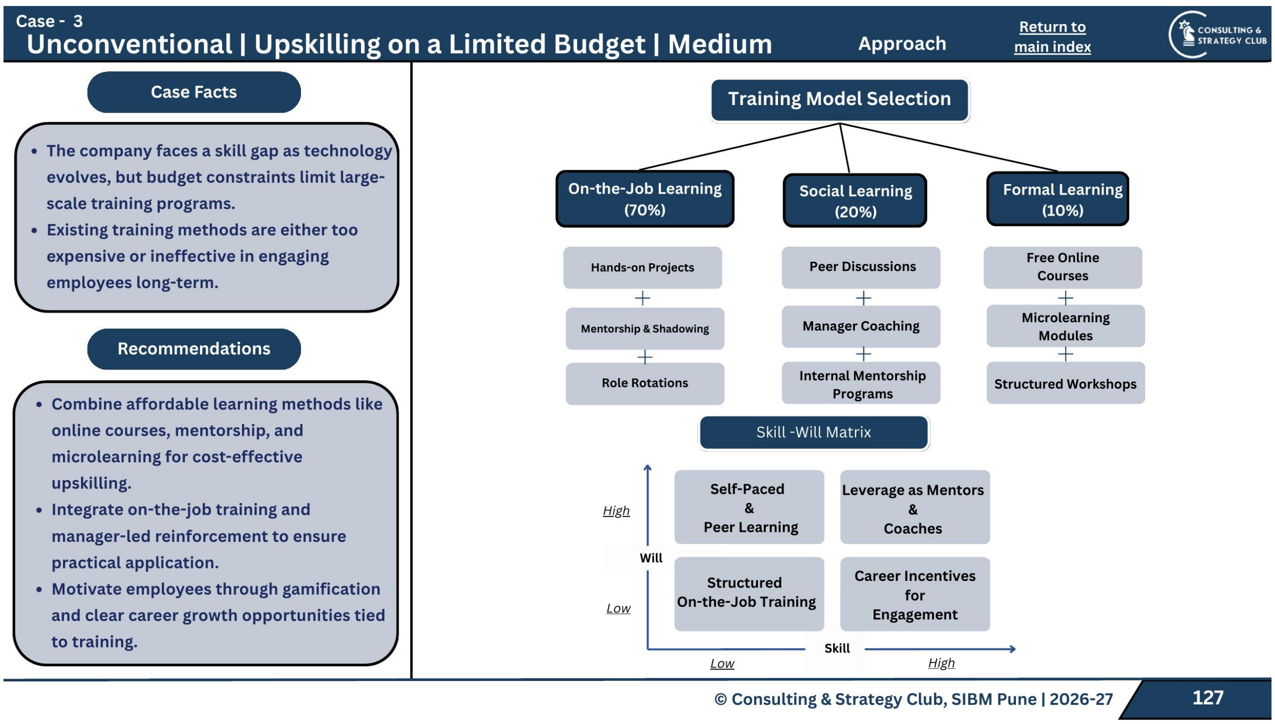
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Our client is facing a challenge—they need to upskill employees for new technologies but have a constrained training budget. How would you approach this problem?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

We'd measure success by looking at how many employees actually complete the training, checking their skill levels before and after to see real improvement, and tracking productivity in roles that rely on these new skills. Employee feedback would be key—if they find the training useful and relevant, we know we're on the right track.

Case 4: Sales Workforce Transition

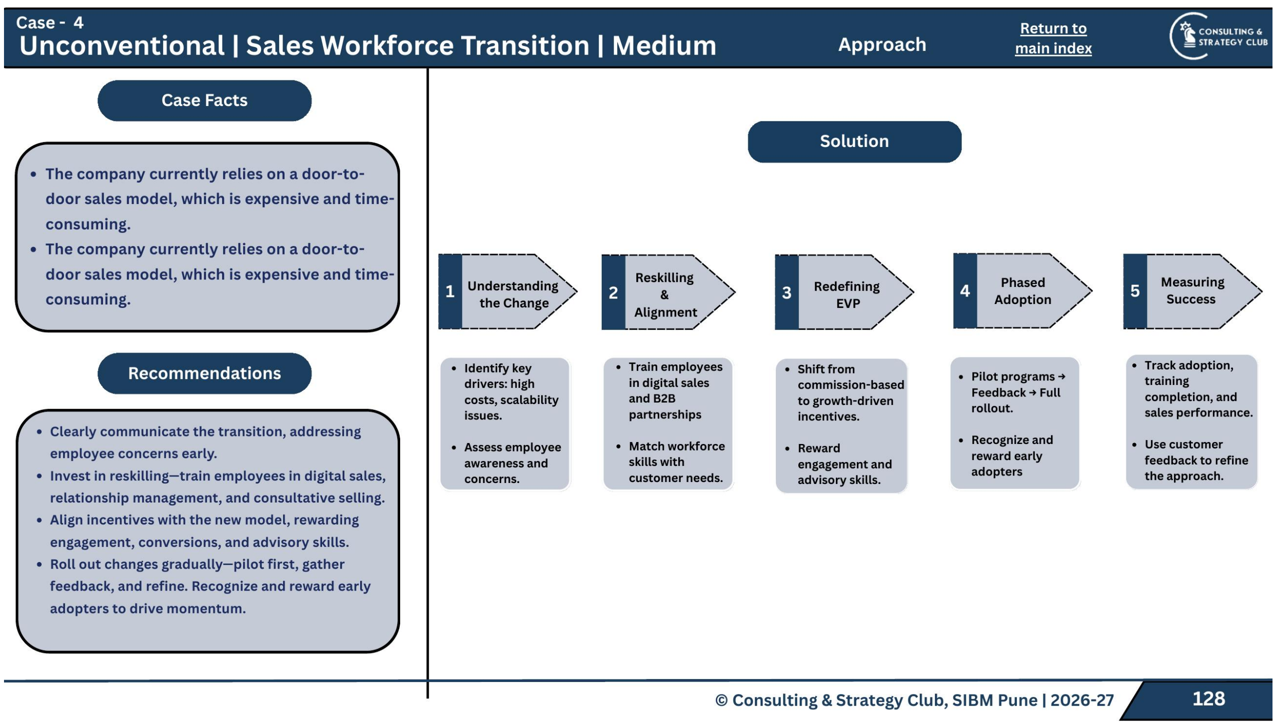
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

We’re looking to move away from door-to-door sales and explore new distribution models. From a people management perspective, how would you approach this transition?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Success will not be just about sales numbers, it will be about how well employees adapt. So, I’d track:
Adoption rates—Are employees using new tools and processes effectively?
Training completion—Are they engaging with reskilling programs?
Performance in new sales channels—Are digital and partnership-driven models actually working?
And finally, customer feedback. If customers are responding positively to the new approach, it’s a strong indicator that our workforce transition is heading in the right direction.

Case 5: ABC Company - Quality Issue

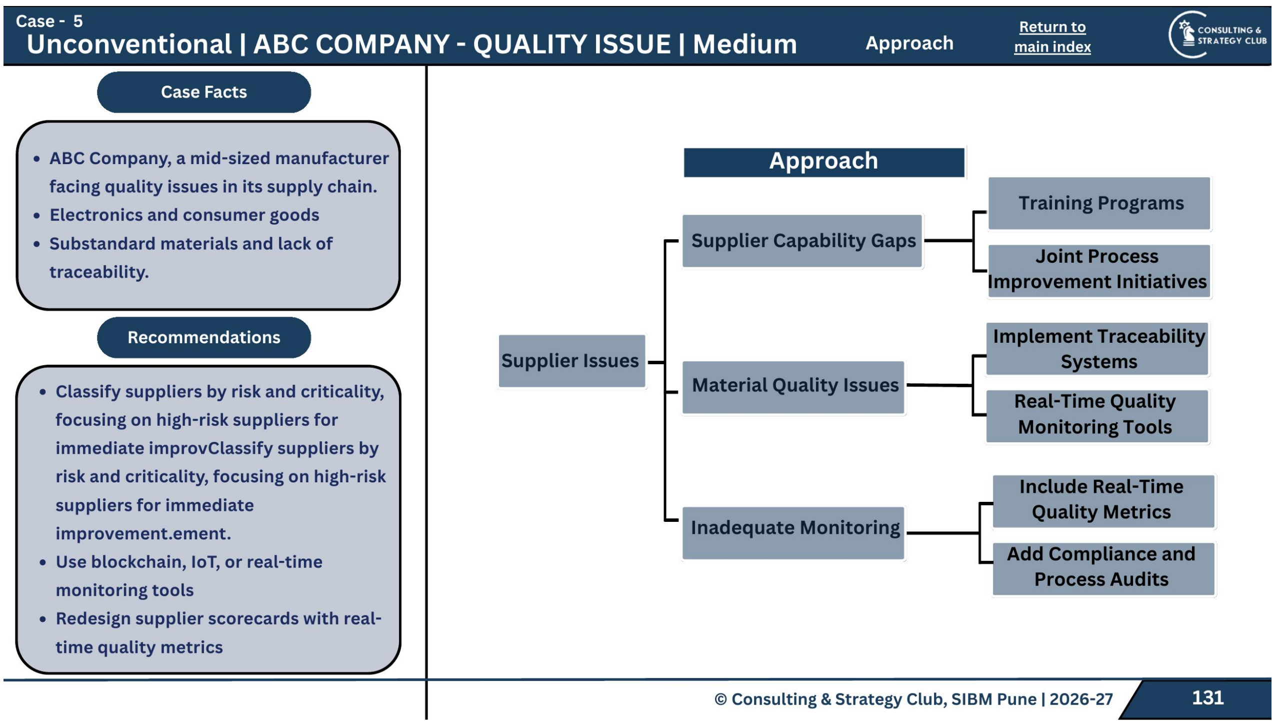
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

A company ABC is facing issues in terms of the quality of products from the different suppliers in its supply chain. Devise a strategy to figure about what could be the issue and how to resolve the same.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

We'll conduct a detailed supplier assessment and develop a tailored implementation roadmap. I'll also share case studies and benchmarks to align on expectations. Does that work for you?

Case 6: Distribution Fleet

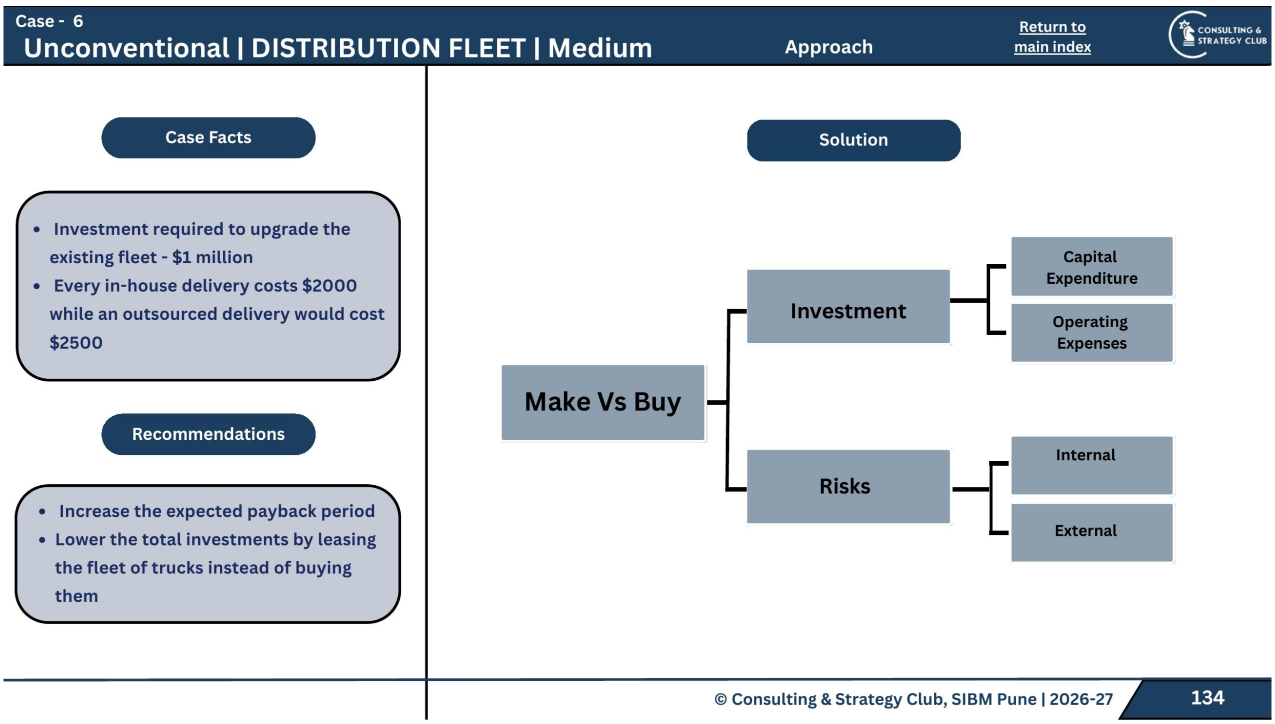
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Your client is a fruit-based beverage company. It has brought you onboard to identify if they should upgrade their current distribution fleet or outsource it to a third party.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Excellent. Those are some great recommendations. Thank you. We can close the case here.
m Interview Transcript main index
133

Case 7: Shopping Mall Construction

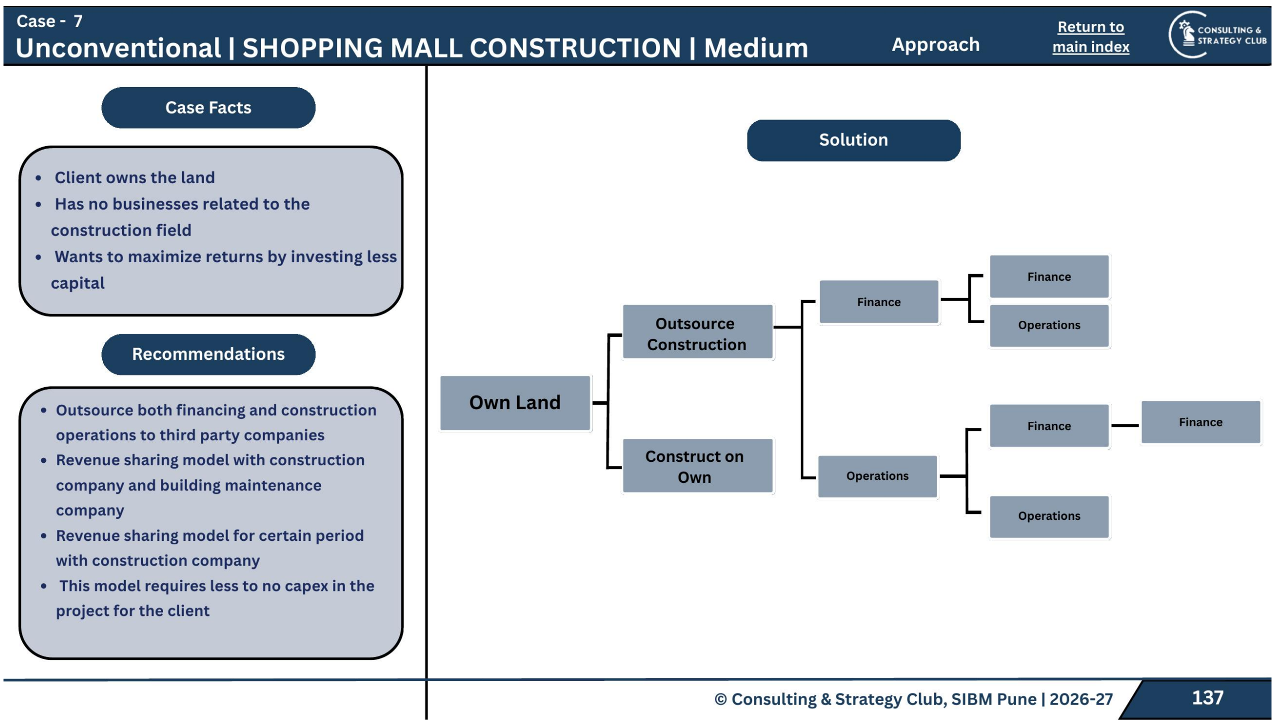
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

A client wants to utilize the land he already owns and is considering building a shopping mall. Estimate the income he could gain.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Cool Thanks. Assuming Rs.20/- is the maintenance charge per sq. foot. The net income would be Rs.30/- per sq. foot. And assuming the net revenue is shared in 50-50 for a certain period with the construction partner, income for the client would be 2,38,360*0.5*30*12=42,908,857 in rupees per year before tax. Corporate tax in India is around 25%(Assuming that there would be some tax benefits). The net income for the client with almost zero investment would be 42,908,857*0.75= Rs.32,178,643.

Case 8: Combatting Counterfeit Product Sales

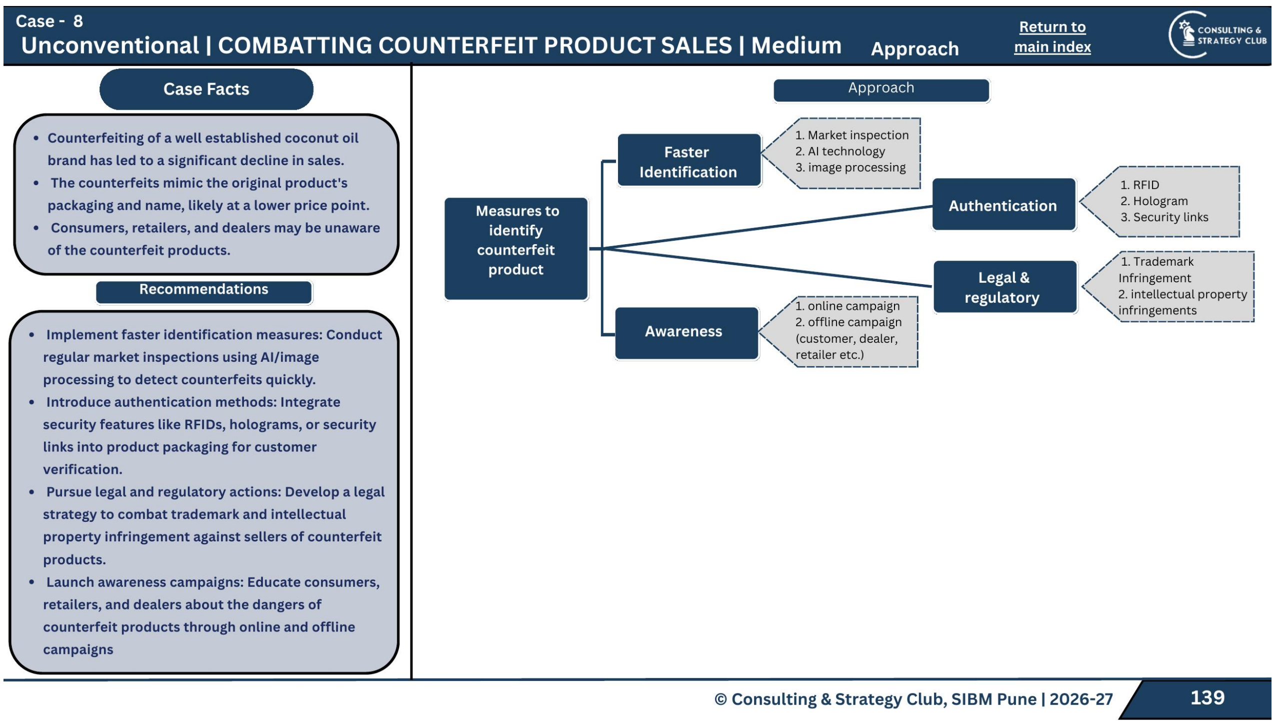
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Given that you are the ASM of a particular area in the organization , how
will you deal with the issue of counterfeit products which are responsible for a major
drop in the sale of our products ?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

I would like to structure my measures into 4 parts namely Faster Identification Measures, Authentication Methods, Legal and Regulatory Measures and Awareness Measures. The Faster Identification measures ensure that the counterfeit products are identified from its inception. Measures like weekly market inspections where competitive products would be analyzed for any brand mimicking in terms of product naming and packaging.AI technologies and image processing technologies can increase effectiveness in identification. The Authentication Measures would include the printing of RFIDs, holograms and security links in the packaging of the product ensuring the customer to authenticate their own products. Legal and Regulatory Measures: Designing of a legal action pipeline should be created to deal with trademark infringement and intellectual property infringement for dealers/retailers who are distributing and selling such products. Awareness Measures: Once a counterfeit product is seen proliferating in the market some localized awareness campaigns should be conducted both in the online and offline markets where the customers, dealers and retailers are made aware of the health hazards of such products

Case 9: Retail App Onboarding

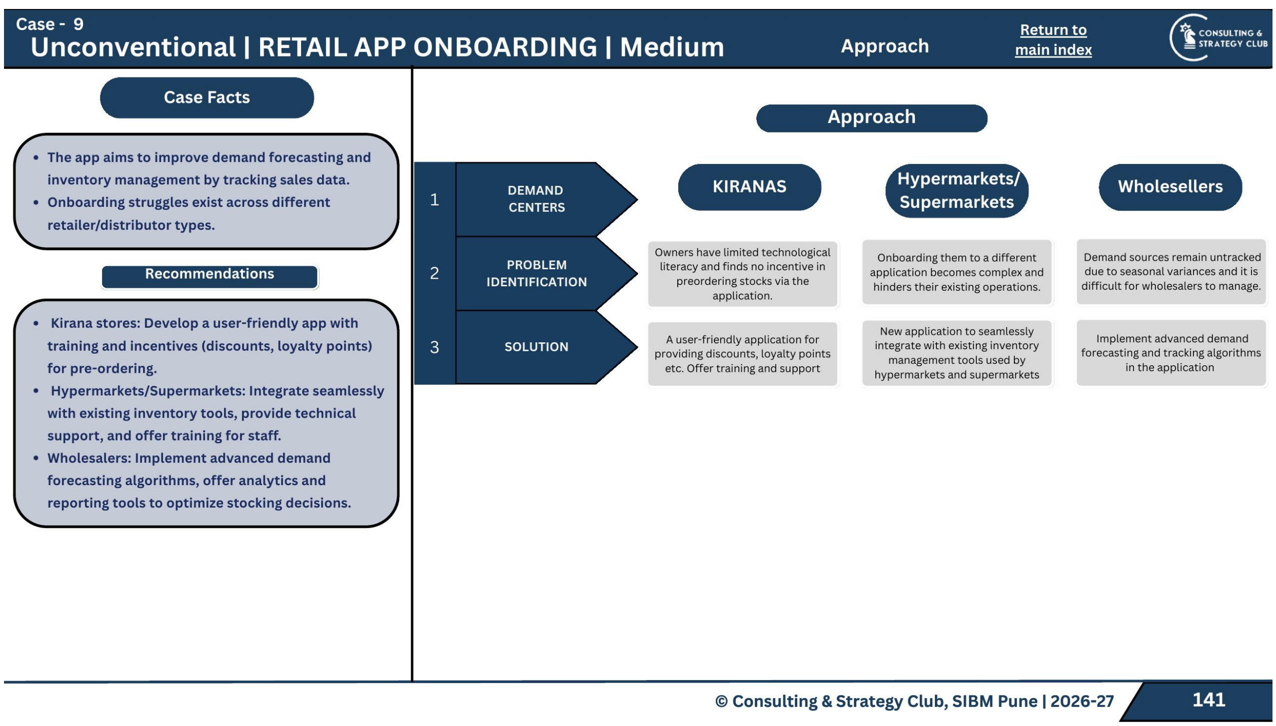
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Coca-Cola has developed a new retail application for all retailers and distributors in India. However, the organization is facing huge challenges in the onboarding of retailers and distributors to use this application. Identify the problems and recommend effective solutions for onboarding the retailers/distributors.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Sure sir!

1. Kiranas:Develop a user-friendly application specifically tailored to the needs and technological capabilities of kirana owners.Provide incentives for preordering stocks via the application, such as discounts, loyalty points etc. Offer training and support to kirana owners to help them become more comfortable with using the application.
2. Hypermarkets/Supermarkets: Customize the new application to seamlessly integrate with existing inventory management tools used by hypermarkets and supermarkets. Ensure compatibility and interoperability to minimize disruption to their operations. Provide dedicated technical support and assistance during the onboarding process to address any compatibility issues or concerns. Offer training sessions and resources to help staff adapt to the new system smoothly.
3. Wholesalers: Implement advanced demand forecasting and tracking algorithms in the application to accurately predict demand from various sources, including retailers, restaurants, hotels, caterers, and quick commerce companies. Provide analytics and reporting tools to wholesalers to help them analyze and manage demand effectively. Offer insights into demand trends, inventory levels, and ordering patterns to optimize stocking decisions and minimize stockouts or overstocking issues. Does these solutions look fair?

Case 10: Marketing Strategy for Two Drugs

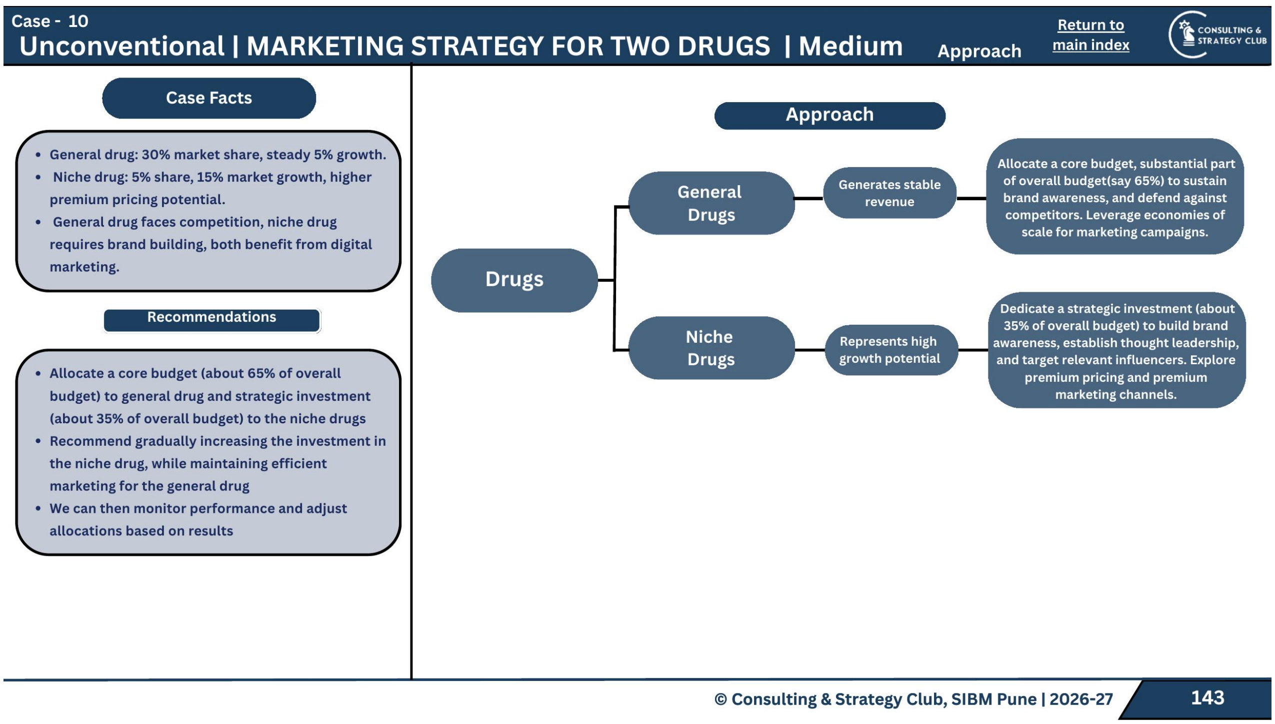
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Our client has two drugs: a successful general medication and a niche, newer entrant. With limited marketing resources and no price cap, how should they prioritize their investments?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

I would recommend gradually increasing the investment in the niche drug, while maintaining efficient marketing for the general drug. We can then monitor performance and adjust allocations based on results.

Case 11: Change Management

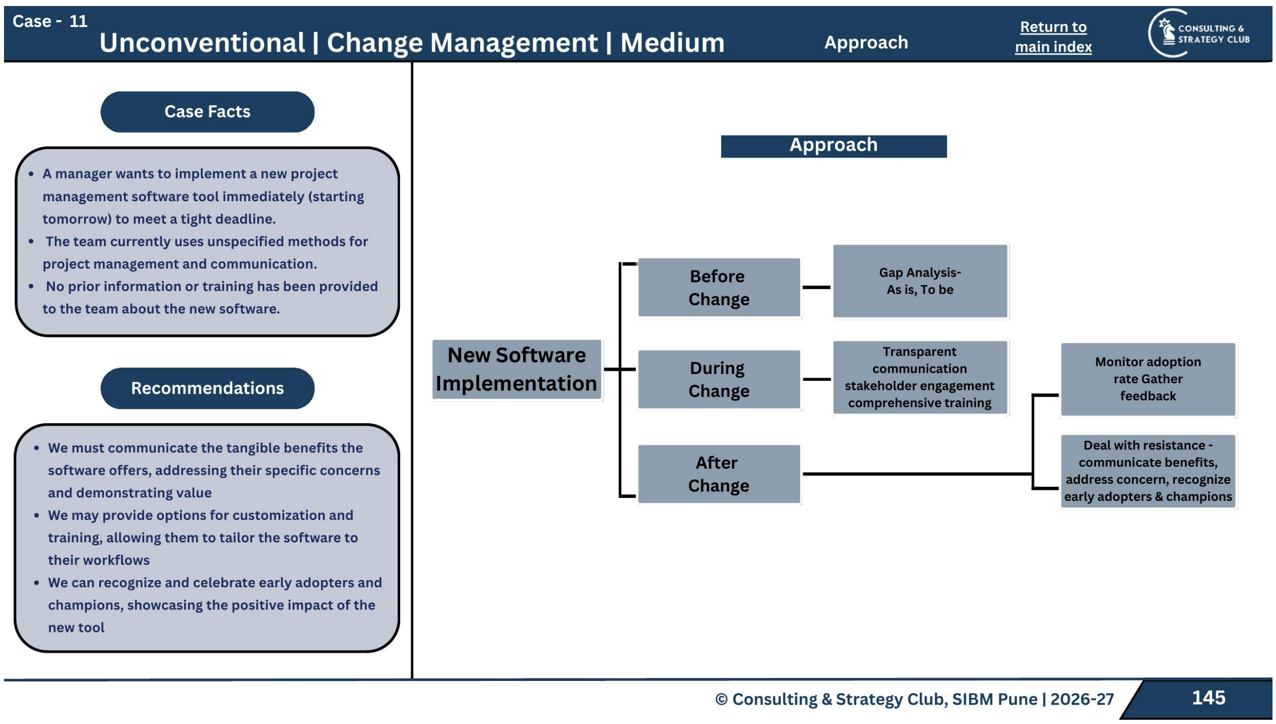
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

I have a new software that I would like you to implement in the team starting tomorrow. Would that be possible? How would you go about it?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Resistance is natural. I would address it by doing things like: We must communicate the tangible benefits the software offers, addressing their specific concerns and demonstrating value. We may provide options for customization and training, allowing them to tailor the software to their workflows. We can recognize and celebrate early adopters and champions, showcasing the positive impact of the new tool.

Case 12: Product Rationalization

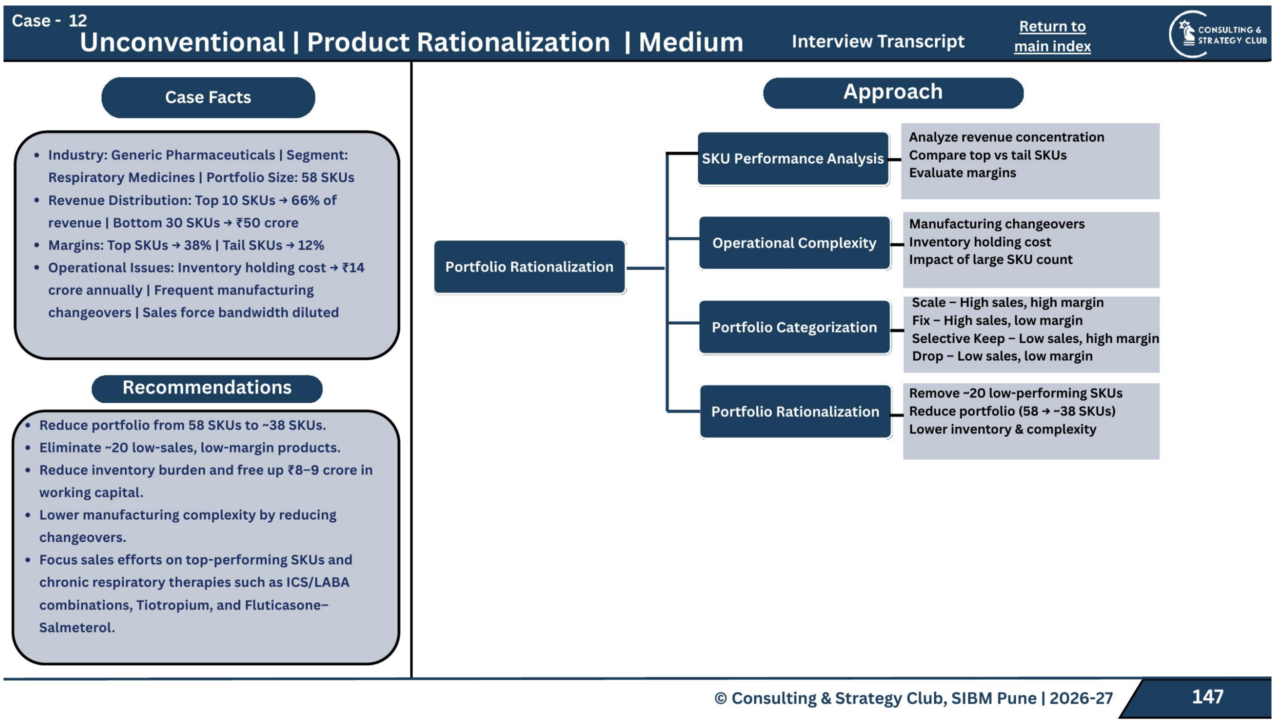
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Your client is a mid-sized Indian generic pharmaceutical company specializing in respiratory medicines. Over time, the company has launched many SKUs across inhalers, nebulizers, and oral drugs. Management now believes the portfolio has become cluttered and wants to optimize it.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Rationalize the portfolio by dropping ~20 low-performing SKUs (low revenue, low margin, disproportionately high inventory cost), focusing on top SKUs (high margin, high contribution), and selectively retaining/improving the remaining SKUs—to boost profitability and reduce operational complexity

Case 13: Capital Allocation

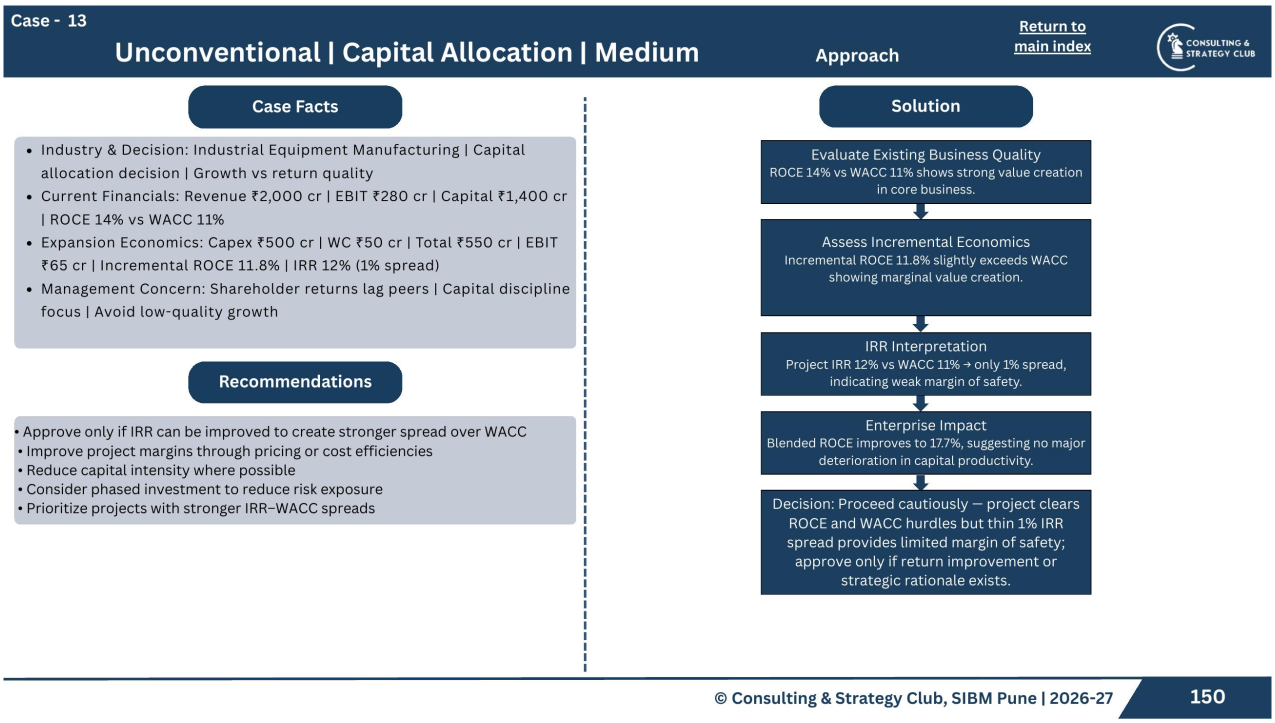
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Your client is a listed mid-sized industrial equipment manufacturer. The company has delivered strong revenue growth of 12–15% CAGR, but shareholder returns have lagged peers. Management proposes a ₹500 crore greenfield expansion to sustain growth. Your task is to assess whether this investment creates or destroys shareholder value.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

I would recommend conditional approval. The company should proceed only if it can improve IRR through margin improvement, cost control, or strategic benefits. Otherwise management should prioritize opportunities with stronger spreads over WACC.

Case 14: Post-Merger Integration

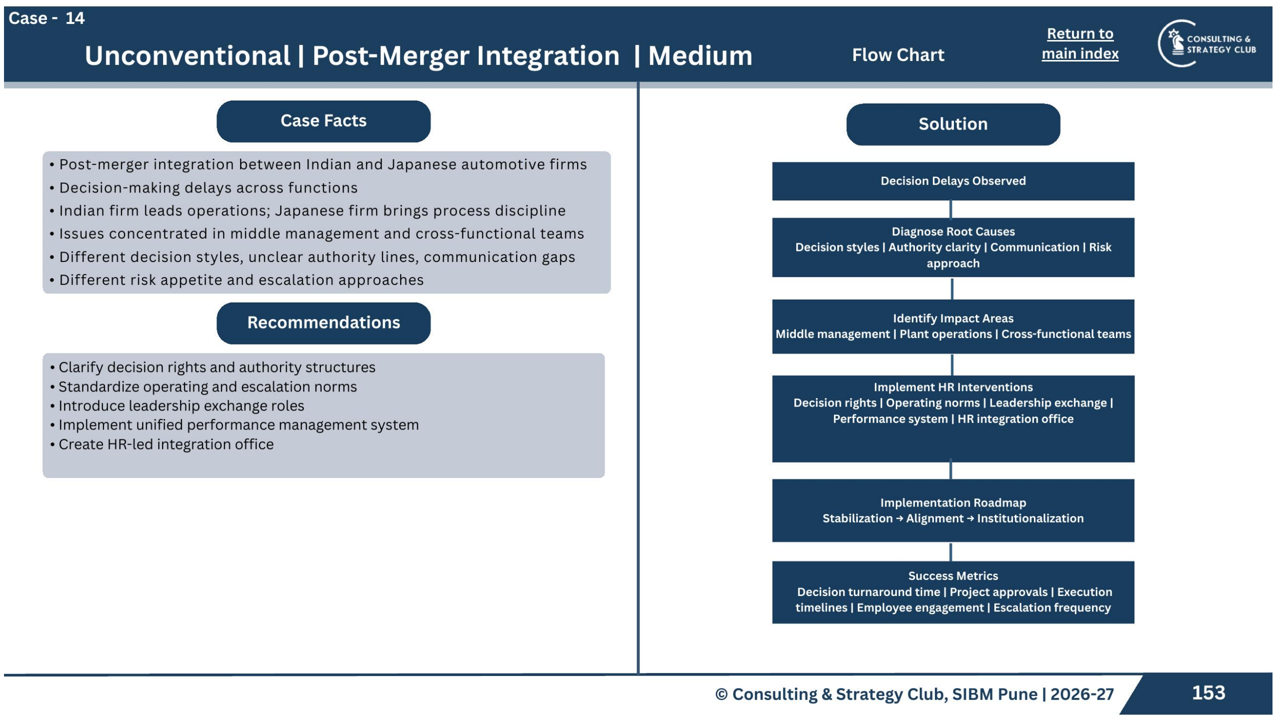
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

Your client is an Indian automotive company that has recently merged with a
Japanese manufacturer.
Post-merger, the leadership team is facing significant decision-making delays across functions.
You are the HR Head. How would you address this?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

We would track:
Decision turnaround time
Project approval cycles
Execution timelines
Employee engagement
Escalation frequency

Case 15: Pharma

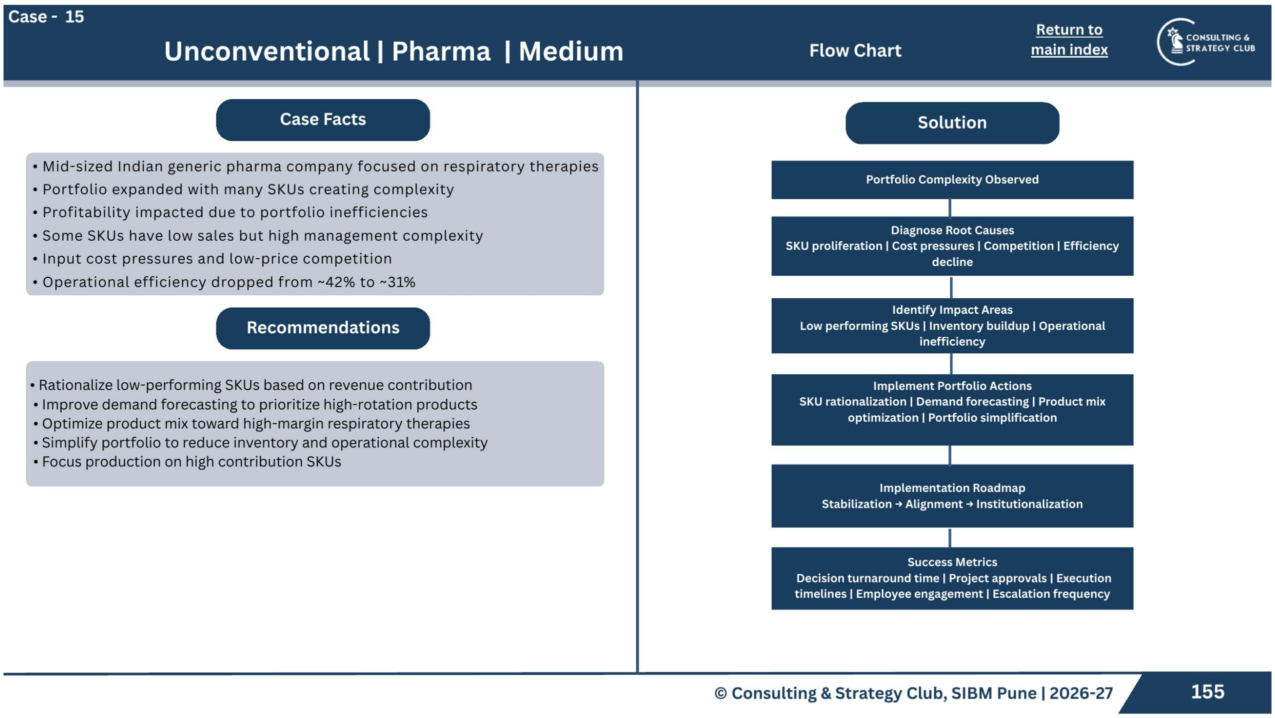
Miscellaneous · Difficulty: Medium

PROBLEM STATEMENT

We have a mid-sized Indian generic pharma company specializing in respiratory medicines. Over time, it has launched many SKUs, and management now feels the portfolio is cluttered. Help optimize it.

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

So the core issue seems clear: too many SKUs → fragmented demand → excess inventory → discounting pressure → lower margins. I would now like to suggest recommendations, may I?

Case 16: Invisible Capacity Trap

Miscellaneous · Difficulty: Medium

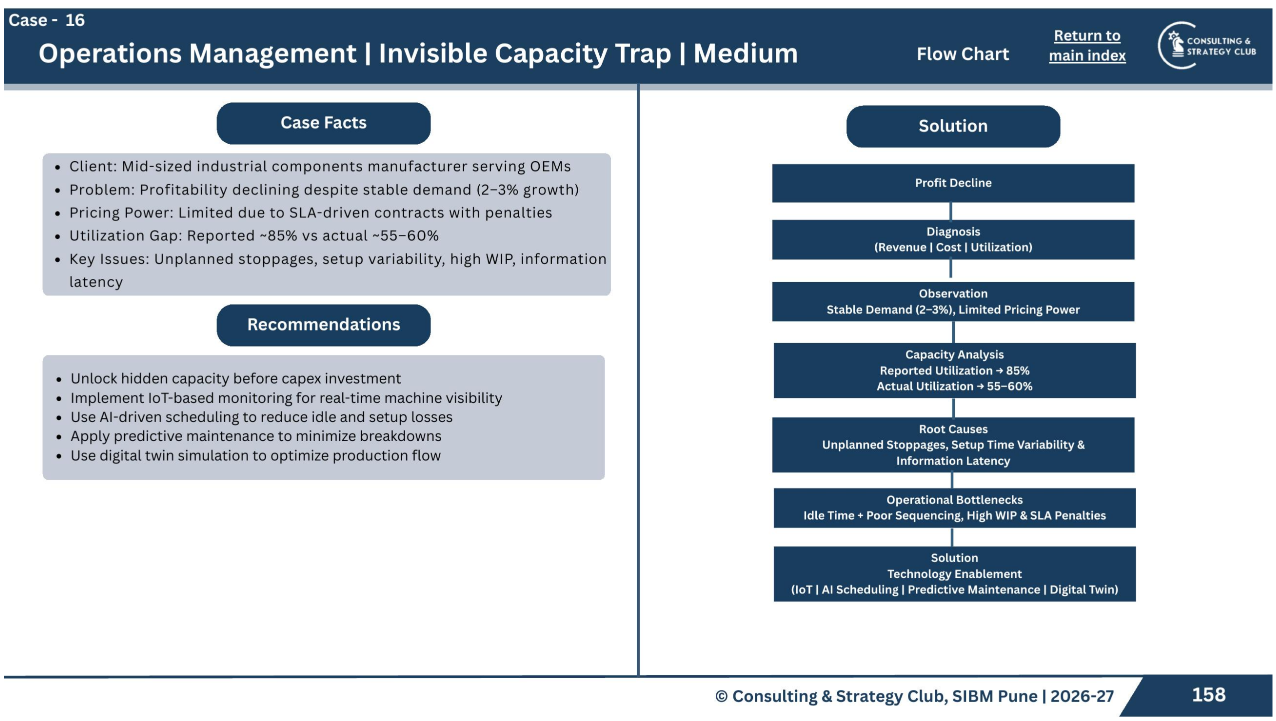
PROBLEM STATEMENT

Welcome to the case round. Your client is a mid-sized industrial components manufacturer supplying high-precision parts to OEMs across automotive, industrial machinery, and energy equipment. Profitability has declined despite stable demand. Your task is to diagnose the issue and recommend a solution.

Just to confirm — the company is facing margin pressure despite stable demand, and I need to identify the root cause and recommend corrective actions. Correct?

APPROACH & FRAMEWORK

The candidate's structuring approach and the framework/diagram used to solve this case, as presented in the casebook:



FINAL ANSWER

Unlock hidden capacity before investing in new machines. Improve visibility, scheduling, and maintenance to restore profitability without capex, layoffs, or price hikes.
